Pricing Overview

The pricing for UST IQ is designed to provide customers with a comprehensive, enterprise-ready data and AI platform at a predictable and transparent cost. This pricing covers access to the core platform capabilities, including data ingestion, processing, analytics, governance, and AI/ML lifecycle management, enabling rapid deployment of data-heavy solutions with minimal operational complexity. The proposed pricing is a fixed fee, ensuring cost certainty with no hidden charges for standard usage within the agreed scope.

Pricing Details

Total Contract Cost: **£22,000 GBP**

Included in Pricing:

- Access to the UST IQ core platform components
- No-code ETL/ELT pipeline development environment
- Data ingestion from supported relational and non-relational sources
- Spark-based processing and pre-compute acceleration
- Merged views, data marts, and BI optimization
- AI/ML application lifecycle management capabilities
- Web-based dashboards and reporting tools
- Standard security, governance, and role-based access controls
- Documentation and standard onboarding support

Additional Costs (If Required):

- Custom integrations or connectors
- Advanced AI/ML model development services
- Extended support, SLAs, or dedicated infrastructure
- Cloud provider infrastructure and data egress costs

Note: Any tools mentioned other than the UST IQ framework will need to be procured or licensed separately.

All additional services are scoped, estimated, and priced separately through a formal change or enhancement request process.
