Service Definition Document G-Cloud

Our blue badges system is a cloud software service for the effective management of blue badges. Our system facilitates enhanced efficiency, tangible savings and improved customer satisfaction levels.

Integration to the DfT national system - our blue badge product provides all the necessary two way integration that is essential for the successful management of blue badges. On successful capture of a new application, an application record will be automatically created and initiate a workflow process, allowing review and assessment of the downloaded forms and supporting evidence. This allows the local authority to process the application alongside the new Blue Badge national system in line with legislation and local policy.

Our blue badges system has been designed and built by working alongside one of our local authority customers to ensure that the product adheres to national and local standards.

The system comes with the following core capabilities:

- Complete managed service via the Cloud with full mobile capability
- Designed and developed from local government and public services
- Created for front-line public services to reduce costs and improve service
- Rapid business deployment method that is flexible and iterative
- Sustainable, flexible and future proof

Features:

- Case management functionality
- Full configuration by the customer
- Data management module for GDPR compliance
- Manages medical assessments
- Flexible, iterative and rapid business deployment method
- Provides single integrated view of case
- Manages medical assessments
- Integration with the DfT application service / API's
- Automatically download new applications (including supporting evidence)
- Automated case creation from application retrieval
- Ability to bulk allocate applications to individuals / roles

Benefits:

- Significant savings in time taken to process transactions and cases
- Ensures relevant information is easily available at all times
- Secure data model
- Improved customer service
- Reduction in paperwork
- Provides automation of manual and time-consuming processes
- Can be tailored to your organisation
- Extremely flexible and sustainable
- Powerful reporting tools
- Enables mobile and agile working

Our blue badge system is built on the ESB service delivery platform, this utilises the latest in cloud computing technology. The platform is robust and flexible and hosted across multiple secure UK data centres for maximum resilience. ESB enables the deployment of new and templated applications in a rapid, yet simple way, supporting agile software methods and principles.

ABOUT US

Pentagull is a team of former local government IT professionals working hard to provide modern, affordable and fairer IT services since 2011.

Our purpose is to deliver better IT for our customers at the lowest cost - built on solid, modern and agile foundations. We have brought together a team of dedicated ICT professionals with a passion and commitment to make a difference.

We specialise in helping local authorities achieve digital transformation and channel shift through our unique technology. To date we have over 40 local authorities across the UK utilising this technology in diverse application areas.

We implement, configure and support Enterprise Service Builder (ESB), an innovative cloud low code, no code platform built by ourselves that enables true end-to-end digital processes.

The Enterprise Service Builder platform is truly unique. It is the only multi-channel, modular and fully configurable platform built by ex-local authority officers that offers the level of sophisticated functionality that a modern public sector organisation requires.

It delivers everything from customer self-service and flexible back office capability through to mobile working, all on one platform, specifically engineered for public services.

Our platform has been written BY local Government FOR local Government. We understand the challenges you face, and we're determined to make a change.

Any questions should be addressed in the first instance to Stuart Gilbert.
