Service Definition Document G-Cloud

Our beach hut/chalet booking system is a cloud software service that allows your organisation to manage beach hut access.

Our booking service allows for the handling of an unlimited number of beach huts, with the ability to manage complex and varied availability periods and locations through a simple and easy-to-use system.

Our service is designed with the user in mind, offering a customer self-service experience. With our online booking feature, users can book their beach huts without contacting the authority, relieving them of the manual task. This convenience not only saves time for the users but also allows officers to focus on other tasks, enhancing overall efficiency.

In the back office, we supply a range of reports to offer you access to data to enable a level of service analysis that would be only possible with a booking system. This allows you to manage your sites with newfound knowledge and reallocate resources with the data to back up your decisions at the touch of a button.

The service comes with the following core capabilities:

- Complete managed service via the Cloud with full mobile capability
- Designed and developed by local government and public services
- Created for front-line public services to reduce costs and improve service
- Rapid business deployment method that is flexible and iterative
- Sustainable, flexible and future-proof

Features:

- Online booking and payment facility
- Flexible booking schedules to allow locations to operate individual opening hours
- Automatic notifications to the customer via email
- Reminder emails are sent at a predefined interval before the booking
- Manage access to resources to enable opening hours to be amended easily and quickly
- Automated, customisable workflow through the organisation
- Data management module for GDPR compliance
- Built-in reporting services
- Data extraction to familiar MS Office application formats
- Configurable business rules providing service control and flexibility
- Deposit facility to allow for booking before new prices are agreed
- Branding to match your authority as a standard

Benefits:

- Our system offers significant time-saving on manual administration.
- Our system empowers you with the ability to close resources and change opening hours easily and quickly.
- With a booking system in place, closed dates and times are not offered to residents, giving you full control over your resources.

Our beach hut/chalet booking system is built on the ESB service delivery platform, which utilises the latest in cloud computing technology. The platform is robust and flexible and hosted across multiple secure UK data centres. This ensures maximum resilience and security, giving you a sense of confidence in the reliability of our system.

ABOUT US

Pentagull is a team of former local government IT professionals working hard to provide modern, affordable and fairer IT services since 2011.

Our purpose is to deliver better IT for our customers at the lowest cost - built on solid, modern and agile foundations. We have brought together a team of dedicated ICT professionals with a passion and commitment to make a difference.

We specialise in helping local authorities achieve digital transformation and channel shift through our unique technology. To date we have over 40 local authorities across the UK utilising this technology in diverse application areas.

We implement, configure and support Enterprise Service Builder (ESB), an innovative cloud low code, no code platform built by ourselves that enables true end-to-end digital processes.

The Enterprise Service Builder platform is truly unique. It is the only multi-channel, modular and fully configurable platform built by ex-local authority officers that offers the level of sophisticated functionality that a modern public sector organisation requires.

It delivers everything from customer self-service and flexible back office capability through to mobile working, all on one platform, specifically engineered for public services.

Our platform has been written BY local Government FOR local Government. We understand the challenges you face, and we're determined to make a change.

Any questions should be addressed in the first instance to Stuart Gilbert.
