Service Definition Document G-Cloud

Our housing enforcement system is a comprehensive cloud-based application that enables authorities to manage inspections under the housing health and safety rating system quickly and efficiently both in the office and out in the field.

The system allows management of housing complaints, recording of inspection details, creation of defined hazards, automated scoring both before and after remedial work, automated notice issue, tracking of remedial progress and enforcement actions.

Designed in conjunction with local authorities to ensure its fit for purpose and efficient. Our software will save you time and money allowing you to use it where it's needed.

The system comes with the following core capabilities:

- Complete managed service via the Cloud with full mobile capability
- Designed and developed from local government and public services
- Created for front line public services to reduce costs and improve service
- Rapid business deployment method that is flexible and iterative
- Sustainable, flexible and future-proof

Features:

- Designed in partnership with local authority teams
- Enables shared service, joint or partnership working
- Full HHSRS inspection functionality
- Browser based responsive design enabling agile and remote working
- Photo, document and evidence management
- Dedicated task management with full audit trail
- Complete in system document production
- Intelligent case linking to increase awareness and reduce duplication
- Full integration into all other ESB products
- Customise data retention periods
- RAG warning of risk levels for easy risk management

Benefits:

- Easy to deploy and use
- Automates administrative tasks and decisions lowering service costs
- Consolidates view of all activity relating to any contact /case
- Rapid deployment time and fast initial user adoption
- Cloud-optimised solution supports field based officers
- Control data access through role based security
- Data is easily reportable
- Enables collaboration with other services and agencies
- Enables officers access to live data to make enforcement decisions
- Works on any internet enabled device

Our housing enforcement system is built on the ESB service delivery platform, this utilises the latest in cloud computing technology. The platform is robust and flexible and hosted across multiple secure UK data centres for maximum resilience. ESB enables the deployment of new and templated applications in a rapid yet simple way supporting agile software methods and principles.

ABOUT US

Pentagull is a team of former local government IT professionals working hard to provide modern, affordable and fairer IT services since 2011.

Our purpose is to deliver better IT for our customers at the lowest cost - built on solid, modern and agile foundations. We have brought together a team of dedicated ICT professionals with a passion and commitment to make a difference.

We specialise in helping local authorities achieve digital transformation and channel shift through our unique technology. To date we have over 40 local authorities across the UK utilising this technology in diverse application areas.

We implement, configure and support Enterprise Service Builder (ESB), an innovative cloud low code, no code platform built by ourselves that enables true end-to-end digital processes.

The Enterprise Service Builder platform is truly unique. It is the only multi-channel, modular and fully configurable platform built by ex-local authority officers that offers the level of sophisticated functionality that a modern public sector organisation requires.

It delivers everything from customer self-service and flexible back office capability through to mobile working, all on one platform, specifically engineered for public services.

Our platform has been written BY local Government FOR local Government. We understand the challenges you face, and we're determined to make a change.

Any questions should be addressed in the first instance to Stuart Gilbert.
