Service Definition Document G-Cloud

Our customer feedback system provides a unified, enterprise-level platform for managing all forms of customer input, including corporate complaints, compliments, and comments, as well as feedback related to adult and children's services.

The solution ensures seamless integration and automated routing of feedback to the appropriate officers, enabling efficient resolution, enhanced accountability, and improved customer experience across the organisation.

The system comes with the following core capabilities:

- Complete managed service via the Cloud with full mobile capability
- Designed and developed from local government and public services
- Created for front-line public services to reduce costs and improve service
- Rapid business deployment method that is flexible and iterative
- Sustainable, flexible and future proof

Features:

- Helps to deliver effective complaints/compliments/comments management
- Data management module for GDPR compliance
- Traffic light system allowing high level of visibility of escalation
- Threshold configuration on escalation levels

- Improve performance meeting regulatory response times
- Customer account to enable them to track their own status
- Authorised staff and customers can track customer interactions
- Powerful search capability
- Role based authentication/authorisation
- Automatically allocate cases to the appropriate individual

Benefits:

- Improve performance meeting regulatory response times
- Deliver effective complaints/compliments/comments management at less cost
- Delivers effective reporting to management, members and other stakeholders
- Provides your customers with enhanced channels to interact with you
- All requests tracked through to completion, reducing call-backs
- Provides automation of manual and time-consuming processes
- Automated responses

Our customer feedback system is built on the ESB service delivery platform, this utilises the latest in cloud computing technology. The platform is robust and flexible and hosted across multiple secure UK data centres for maximum resilience. ESB enables the deployment of new and templated applications in a rapid yet simple way supporting agile software methods and principles.

ABOUT US

Pentagull is a team of former local government IT professionals working hard to provide modern, affordable and fairer IT services since 2011.

Our purpose is to deliver better IT for our customers at the lowest cost - built on solid, modern and agile foundations. We have brought together a team of dedicated ICT professionals with a passion and commitment to make a difference.

We specialise in helping local authorities achieve digital transformation and channel shift through our unique technology. To date we have over 40 local authorities across the UK utilising this technology in diverse application areas.

We implement, configure and support Enterprise Service Builder (ESB), an innovative cloud low code, no code platform built by ourselves that enables true end-to-end digital processes.

The Enterprise Service Builder platform is truly unique. It is the only multi-channel, modular and fully configurable platform built by ex-local authority officers that offers the level of sophisticated functionality that a modern public sector organisation requires.

It delivers everything from customer self-service and flexible back office capability through to mobile working, all on one platform, specifically engineered for public services.

Our platform has been written BY local Government FOR local Government. We understand the challenges you face, and we're determined to make a change.

Any questions should be addressed in the first instance to Stuart Gilbert.
