

G-Cloud 15 – Lot 3

Customer Portals & Self-Service Experience Enablement

delaware Digital LLP

we commit. we deliver.

delaware Digital:

public sector digital cloud services

We commit. We deliver.

delaware Digital delivers outcome led- cloud services for **digital experience platforms** - helping public sector organisations **plan, migrate, run and continuously improve** websites, portals, content and asset platforms, and connected customer experience capabilities.

Whether you need stable BAU support, a safe migration, or a change programme to unlock value from your digital estate, we provide a consistent, repeatable approach designed to reduce delivery risk and improve service performance over time.

With **5,000 professionals across 38 offices in 20 countries**, our UK & Ireland teams combine local delivery confidence with global capability for scale and specialist reach.

At a glance

Outcome-led **digital & CX cloud services**, shaped for public sector governance and audit needs.

Delivery across the lifecycle: **discovery and roadmapping, set up and migration, integration enablement, training / adoption, and ongoing support and optimisation (AMS).**

Backed by delaware's wider **Microsoft and SAP** capability to support secure integration, data foundations and resilient operations where in scope.

Menu style support: choose what you need (from break/fix to proactive improvement), with coverage scalable as requirements change (including extended hours/out- of -hours by agreement).

Responsible AI by design: where AI-enabled- capabilities are introduced, governance and controls are treated as essential foundations.

How buyers engage with us

We support both direct award and competitive selection, depending on your requirement and the route you choose on G Cloud. Services can be bought as discrete outcome packages or combined into an -end-to-end- **plan → deliver → run → improve** engagement.

About delaware

5,000 professionals

38 offices in
20 countries

£500M+
revenue

Our partner ecosystem

Your trusted transformation partner (Digital, backed by Microsoft and SAP)

We make the technology you use to connect with **citizens, customers, service users and colleagues** work better, faster, easier and more cost-effectively.

Enhancing experiences

delaware Digital elevates your digital landscape to streamline everyday operations, support service improvement, and deliver richer, more intuitive experiences.

True end-to-end- partnership

From strategic road mapping through implementation and migration, to ongoing optimisation and support, delaware Digital is by your side throughout your digital transformation journey.

Enabling you to make the most of AI

Our partner ecosystem and specialists help you apply automation and AI where it is appropriate and beneficial - improving efficiency and freeing teams to focus on the work that matters most.

Putting trust back in your data

We help you consolidate and govern your data to create a single source of truth, reduce overheads, improve productivity, and unlock the potential of AI and analytics.

Backed by enterprise cloud foundations (Microsoft and SAP)

Digital services rarely exist in isolation. When your digital estate connects to enterprise platforms, integration services and data foundations, delaware Digital is backed by delaware's wider **Microsoft and SAP** practices - strengthening delivery where Azure/Microsoft services and SAP landscapes are in scope, and supporting public-sector expectations for security, continuity- and governance.

Managed Services: choose what you need

delaware provides tailor-made Managed Services. Buyers can select only the components they require and **scale coverage as needs change** - helping avoid paying for unused capability while retaining a clear path to expand support as services become more critical.

Assurance, security and responsible AI

We operate with an assurance-first mindset, with governance and evidence built into how we deliver and run services. Typical measures include security monitoring and logging aligned to platform tooling (where in scope), BCDR planning with tested runbooks, and responsible AI governance for any AI-assisted delivery.

Sustainability and social value

We align delivery to the Social Value Model and embed sustainability into how we work - including remote-first delivery by default and practical "green IT" improvements (for example, right-sizing non-production environments and retention/data lifecycle controls). Contract-specific commitments are agreed at mobilisation and reported through governance.

Pricing and value for money

We aim for transparent, auditable pricing that maps clearly to roles and outcomes, with explicit assumptions and change control to prevent unplanned cost growth. Menu-style service design helps avoid paying for unnecessary coverage, and we use automation and repeatable accelerators to improve consistency and reduce BAU effort where possible.

What delaware Digital delivers

We deliver digital platform enablement and cloud support across the full customer experience estate - from content and experience platforms to commerce, product data and CRM - supported by integration, data, change and managed services.

Core capability areas

Websites: Content Management Systems (CMS), Digital Asset Management (DAM) and web content operations

Portals: Digital Experience Platforms (DXP) and self-service- experiences

Web shops: Product Information Management (PIM) and e-commerce enablement and operational readiness

Apps: Platform integration and connected experiences

CRM: Adoption, configuration and optimisation

Platform and partner ecosystem

We work with the industry-leading platforms across the digital experience ecosystem, ensuring our customers only receive the best solutions. Examples include:

- Optimizely
- Inriver
- Kontent.ai
- Sitecore
- Akeneo
- Virto Commerce
- Salesforce
- Hubspot
- SAP CX
- Kentico
- Keyshot
- Aprimo

Foundations

Integrations: API/iPaaS integration and connected platform services

Implementation: requirement gathering, solution design and configuration, system build and testing, deployment management, and transition to business-as-usual operations

Data: governance, structure and “single source of truth” enablement

Change: adoption support, training coordination and operational readiness

AMS: ongoing support, optimisation and continuous improvement

We also support findability, content performance and measurement (for example SEO/GEO, analytics and reporting) as part of operating and improving digital services.

- Full customer lifecycle account manager

Customer Portals & Self-Service Experience Enablement

Lot: G-Cloud 15 — Lot 3: Cloud Support

Service type: Set Up and Migration (with managed support option)

Platforms: Microsoft Power Pages, DXP portals

Service overview

delaware Digital enables cloud **customer portals** and **self-service experiences** that improve **journeys** and reduce avoidable **contact**. We configure **secure environments**, design portal **information architecture** and **search**, set up **forms** and **workflows**, integrate **identity** (for example **Azure AD**) and **back-office systems**, and coordinate **testing** and **go-live readiness**. **Accessibility** and **operational readiness** are built into how we configure and validate the service.

Managed support can be added to keep portals **stable**, **secure** and **continuously improving**.

Buyer outcomes

- Faster self-service launch with reduced delivery and go-live risk
- Improved citizen/customer experience through intuitive journeys and search
- Reduced contact centre demand through effective deflection and automation
- Secure access using role-based permissions and identity integration
- Improved accessibility confidence through WCAG-aligned configuration and testing

What's included

Enablement, configuration and migration (set-up & migration)

- Discovery workshops to confirm users, journeys, scope and success criteria
- Configure environments, roles/permissions and security settings
- Portal information architecture, navigation, taxonomy and search setup
- Forms, workflows, approvals and case routing configuration
- Identity integration (SSO, Azure AD, customer authentication) enablement
- Integration with CRM/case management, ERP and knowledge systems
- Content/forms migration planning, validation and cutover coordination

Managed support and optimisation

- Support onboarding (SLAs, RACI, escalation, tooling, service calendar)
- Ticket triage across incidents, requests and access administration
- Monitoring, alerting and performance optimisation
- Release governance, regression checks and validation support
- Service reviews, reporting and continuous improvement backlog management
- Vendor escalation coordination where required
- Training coordination, knowledge base and adoption support

Delivery approach

Deliverables (typical)

- Discovery outputs: scope, success criteria, risks / dependencies and delivery plan
- Configuration record: environments, roles/permissions, workflows and governance settings
- Migration mapping and readiness outputs (including content inventory outcomes as agreed)
- Cutover plan including rehearsal steps, go / no-go criteria and rollback plan
- QA coordination plan and validation evidence (as agreed)
- Integration enablement notes and operational considerations (as applicable)
- Training and knowledge transfer pack (admin/editor enablement, runbooks)
- Support onboarding pack: SLAs, RACI, escalation routes, service calendar and reporting cadence
- Continuous improvement backlog and service review outputs (where managed support is included)

Support model and service levels

Support channels and hours (baseline)

- **Online ticketing:**
09:00–17:00 UK time, Monday to Friday
- **Phone support:**
09:00–17:00 UK time, Monday to Friday
- **Web chat support:**
09:00–17:00 UK time, Monday to Friday

Support levels (options)

- **Standard Support:** baseline hours and targets above (via online ticketing for service administration and tenant provisioning queries).
- **Enhanced Support:** extended hours and faster response targets, with enhanced incident coordination.
- **Out-of-Hours Support:** by agreement for defined periods or priority incidents only.

Response targets

- Ticket acknowledgement: **within 1 business hour** (during service hours)
- Initial response: **within 4 business hours** (during service hours)
- Tickets raised outside service hours are acknowledged by **09:00 UK time next business day**, unless enhanced/out-of-hours support is agreed.

Governance

We provide a named **Service Delivery Manager (SDM)** to oversee service governance, reporting, escalation and continuous improvement.
