

G-Cloud 15

Azure Data Lake Services

Service Definition

Service Overview

Ceox's Azure Data Lake Services enables Public Sector Organisations to build a data platform for analytics and AI. Deliver Public Services with a data-centric approach. The Azure Cloud-Based solution supports design and development of Open Data Lake, Data Warehouse, Data Analytics, Reporting and AI capabilities. Includes Purview, Databricks, Power BI.

Ceox is proud to offer a comprehensive suite of data services, meticulously designed to support the unique needs of public sector organisations. Our expertise spans across all facets of the Microsoft data platform, ensuring that our clients can harness the full potential of their information assets for improved decision-making, operational efficiency, and service delivery.

Our Business Intelligence solutions, powered by Power BI, enable organisations to visualise complex data sets, uncover actionable insights, and drive better outcomes for citizens. We help you set up intuitive dashboards and interactive reports that make data accessible to all stakeholders, fostering a culture of transparency and accountability.

Through Data Analytics, Data Engineering, and Data Architecture services, Ceox assists public sector bodies in building robust data foundations. We design and implement solutions on scalable infrastructure that securely manages and processes vast amounts of information, adhering to stringent compliance and governance standards essential in government environments.

Our Data Science offerings enable predictive analytics and advanced modelling, helping organisations to anticipate trends, optimise resources, and better serve communities. From statistical analysis to machine learning, we deliver solutions that transform raw data into strategic advantage.

We provide Data Testing and Data Warehouse services to ensure data integrity, consistency, and availability. By establishing reliable storage and validation procedures, we help public sector organisations maintain trust in their data and facilitate seamless reporting across departments.

Our Data Strategy services guide organisations in developing long-term plans for data use, management, and innovation. We work collaboratively to create roadmaps that align with organisational goals and regulatory requirements, fostering sustainable growth and digital transformation.

For organisations looking to modernise or consolidate their systems, Ceox offers Data Migration services utilising tools such as the KingswaySoft SSIS Integration Toolkit. Our proven methodologies ensure secure, efficient migration of data

between legacy and modern platforms, minimising disruption and preserving data quality throughout the process.

By partnering with Ceox, public sector organisations gain access to a team of seasoned professionals committed to delivering tailored solutions and measurable value. Our approach is collaborative, transparent, and focused on empowering organisations to make data-driven decisions that deliver world class digital services.

Our Features

Our service includes:

- This service is designed to deliver Microsoft Fabric as a core capability.
- It enhances organisational performance by providing unity catalogue.
- Teams benefit from the inclusion of lakehouse, improving day-to-day outcomes.

About Us

We are a certified B-Corp, on a mission to help UK Public Sector organisations use Microsoft technologies to deliver world-class digital services.

We work with Government Departments, Agencies and Public Bodies to drive efficiencies, create engaging citizen services and enable modern digital government.

As a Microsoft Solutions Partner with designations in Business Applications, Data & AI and Digital & App Innovation, we are experts in Agentic AI, Power Platform, Dynamics 365 and the Azure Data Platform. Our team brings extensive public sector experience, from large government departments to mid-size agencies and smaller non-departmental public bodies.

Ceox combines proven technical expertise with an agile, straightforward approach that makes it easy for organisations to use Microsoft technology and deliver world-class digital services.

Cert no: 24565

Our Other Services

Ceox offers a comprehensive suite of services to public sector organisations, all accessible via G-Cloud and other procurement frameworks. Our expertise spans several key areas, each designed to support the delivery of efficient, citizen-centric modern digital government.

Agentic AI

Our Agentic AI services are tailored to enable the transformation of public sector organisations, providing advanced AI agent solutions that drive significant efficiency gains whilst maintaining quality of service and delivering world-class digital services.

Citizen Facing Services

We specialise in building engaging and compliant citizen-facing digital services. Each service is aligned with the Government Digital Service (GDS) Service Standard, ensuring that organisations can deliver world-class public services that are both user-friendly and effective in meeting the needs of citizens.

Business Applications

Ceox designs, builds, and supports best-in-class business applications leveraging the Power Platform and Dynamics 365, focused on improving operational efficiency. We also provide strategic guidance and empower citizen developers to create and manage their own digital tools.

Data & Analytics

We enable organisations to extract valuable insights from their data by utilising the robust suite of data tools available on Microsoft's Azure cloud platform. Our services include the construction of enterprise-grade data warehouses and analytics solutions, allowing organisations to make informed decisions, optimise their operations and deliver world-class digital services.
