Correspondence Triage Agent in Copilot Studio

Service Definition

Service Overview

Ceox Correspondence Triage Agents enable a public sector organisation to deliver autonomous agents, which intelligently triage incoming correspondence, ensuring all correspondence is accurately reviewed, categorised and automatically assigned to the appropriate teams and users for timely processing. This delivers improved efficiency, consistency and oversight of high-volume correspondence across the organisation.

Ceox's Agentic AI Services are designed to deliver transformative outcomes for public sector organisations, combining advanced artificial intelligence technology with deep sector expertise to drive better results, improved efficiency, and robust compliance. Our suite of services is tailored to meet the unique challenges faced by government bodies and public agencies, supporting their mission to serve citizens more effectively in a rapidly changing digital landscape.

Comprehensive Compliance and Security

Navigating the stringent regulatory environment of the public sector, Ceox ensures all solutions adhere to the GDS Service Standard, Generative AI Framework, and Artificial Intelligence Playbook. Our commitment to security is evidenced by our ISO27001 certification. This guarantees that your data and operations are protected to the highest standards.

Driving Efficiency and Value

Our Agentic AI Services are engineered to maximise return on investment while delivering tangible value. By reducing errors, streamlining processes, and fostering continuous improvement, we help public sector teams enhance productivity, consistency, and reliability. The integration of AI-driven automation, with automated testing and process mining for continual improvement, allows an organisation to refocus resources on high-impact initiatives.

Expertise You Can Trust

We bring leading-edge expertise in prompt engineering, training, and skills transfer to empower your staff. We manage licensing and token & credit usage, ensuring your teams are fully equipped to harness the potential of AI. Our focus on upskilling and knowledge sharing ensures a sustainable adoption of technology across your organisation.

Uncompromising Quality and Governance

Quality assurance is at the core of our offering, with robust performance testing, evaluation, and automated testing regimes in place. Our governance frameworks ensure that all AI deployments are transparent, auditable, and aligned with best practice standards, including Well Architected Framework and AI Workload management.

Advanced Functionality for Modern Needs

Our Agentic AI Services encompass a wide range of intelligent capabilities, such as transcription, classification, categorisation, summarisation, extraction, generation, and process automation. These tools unlock new insights and efficiencies, enabling public sector organisations to improve service delivery and respond dynamically to citizen needs.

Reliable Support and Agile Delivery

We provide end-to-end support through ITIL-aligned service management, utilising platforms like Azure DevOps and Freshdesk to ensure robust incident response and service continuity. Our agile delivery approach, spanning discovery, design, delivery, and optimisation phases, guarantees that solutions evolve in step with your organisation's goals.

Trusted Partnerships and Best Practice

As a Microsoft Data & AI Solutions Partner, Ceox leverages deep industry alliances to bring cutting-edge solutions to the public sector. Our Centre of Excellence fosters continual innovation and knowledge-sharing, ensuring your organisation benefits from the latest advancements and proven best practices.

Choose Ceox's Agentic AI Services to unlock smarter, faster, and more secure ways of working—empowering your public sector organisation to deliver world-class digital services.

About Us

We are a certified B-Corp, on a mission to help UK Public Sector organisations use Microsoft technologies to deliver world-class digital services.

We work with Government Departments, Agencies and Public Bodies to drive efficiencies, create engaging citizen services and enable modern digital government.

As a Microsoft Solutions Partner with designations in Business Applications, Data & AI and Digital & App Innovation, we are experts in Agentic AI, Power Platform, Dynamics 365 and the Azure Data Platform. Our team brings extensive public sector experience, from large government departments to mid-size agencies and smaller non-departmental public bodies.

Ceox combines proven technical expertise with an agile, straightforward approach that makes it easy for organisations to use Microsoft technology and deliver world-class digital services.

Cert no: 24565

Our Other Services

Ceox offers a comprehensive suite of services to public sector organisations, all accessible via G-Cloud and other procurement frameworks. Our expertise spans several key areas, each designed to support the delivery of efficient, citizen-centric modern digital government.

Agentic AI

Our Agentic AI services are tailored to enable the transformation of public sector organisations, providing advanced AI agent solutions that drive significant efficiency gains whilst maintaining quality of service and delivering world-class digital services.

Citizen Facing Services

We specialise in building engaging and compliant citizen-facing digital services. Each service is aligned with the Government Digital Service (GDS) Service Standard, ensuring that organisations can deliver world-class public services that are both user-friendly and effective in meeting the needs of citizens.

Business Applications

Ceox designs, builds, and supports best-in-class business applications leveraging the Power Platform and Dynamics 365, focused on improving operational efficiency. We also provide strategic guidance and empower citizen developers to create and manage their own digital tools.

Data & Analytics

We enable organisations to extract valuable insights from their data by utilising the robust suite of data tools available on Microsoft's Azure cloud platform. Our services include the construction of enterprise-grade data warehouses and analytics solutions, allowing organisations to make informed decisions, optimise their operations and deliver world-class digital services.
