

Flashpoint Pricing for G-Cloud15

Echosec Platform	Desc: Gathers real-time data from social media, messaging apps, and online discussions, and maps posts by geolocation. Includes a map-based investigations view (Locate) and a monitoring and alerting view (Monitor).	\$22800	
Ignite Platform	Desc: Delivers tailored and actionable intelligence across the deep and dark and surface web, to help analysts focus on the threats that matter, make smarter decisions, and protect their people, places, and assets.	\$24000	
Identify	Desc: Identify is an identity intelligence tool that surfaces Flashpoint's most unique, difficult-to-access datasets so organizations can gather key information and establish connections between individuals, locations, and illicit actors. It is comprised of compromised credential, strategic entities, and host based data sets.	\$20000	Government entities only
VulnPremium	Desc: Proactive defense against cyber threats with the most comprehensive and actionable vul intelligence available. By combining human-powered data collection with intuitive technology, we deliver a centralized platform for vuln and attack surface management teams to efficiently identify, assess, and remediate exposures. Vulnerability intelligence delivers timely, high-quality data on the latest vulnerabilities, including over 100,000 not found in the CVE database. Make informed decisions, prioritize remediation efforts, and build, buy, and maintain the most secure systems for your org.	\$6120
