Nucleus Licensing Packages

Nucleus Standard License

Nucleus Platform Highlights:

- Integrates with 160+ asset, security, & threat tools
- Rapid new integrations via FlexConnect
- Asset and vulnerability deduplication across time, tools, and environments
- Unified risk score (0–1000) with asset context and threat intelligence
- Unlimited: users, API access, integrations, and ingest
- Threat and exploit intelligence from over 16 feeds
- Bi-directional integrations with Jira, ServiceNow, GitHub, Azure DevOps, and more
- Exportable dashboards and reporting, with BI tool support
- **New:** Nucleus Insights with Nucleus Threat Rating

Nucleus Advantage License

Everything in the Nucleus Standard License plus:

Vulnerability Intelligence Platform (VIP)

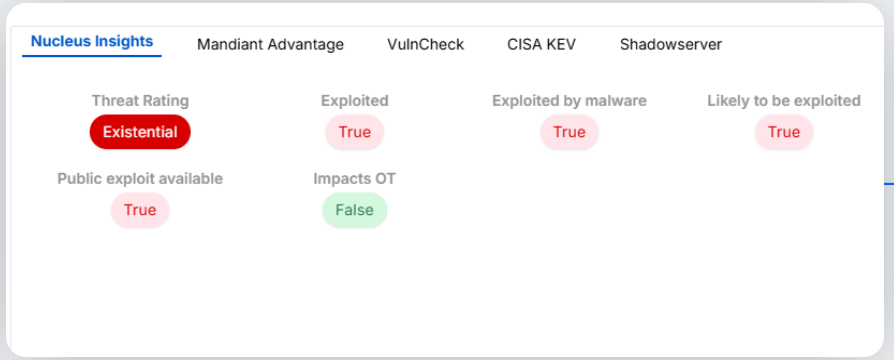
- Unifies real-time threat intelligence from 16+ feeds
- Enables custom threat feed integration
- Accelerates vulnerability threat analysis
- Automates threat landscape monitoring
- Speeds response to zero-days and emerging

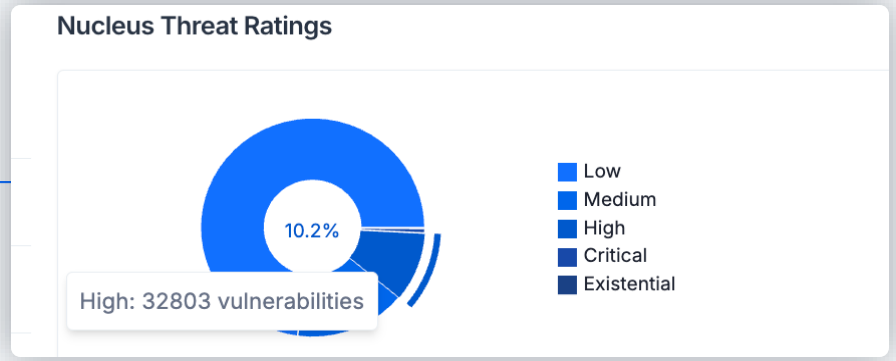
POA&M Process Automation

- Simplifies FedRAMP compliance
- Centralizes tracking, evidence, and planning
- Automates POA&M creation based on SLAs
- Tracks owners, deadlines, risk categories, and status
- Generates audit-ready reports with evidence trails

Nucleus Insights

- **Real-time threat insights** built into the Nucleus Platform
- **One feed** from 16+ sources: curated, normalized, and ranked
- **Operational Insights:** exploited, in-the-wild, PoC available, malware use, OT impact
- **Fully integrated** with risk scores, SLAs, and automation





Nucleus Threat Rating

- Threat Rating based on **real-world threat activity**
- **Continuously recalculates** real-time data from curated list of threat intelligence feeds
- **Five Threat levels** from Low to Existential
- **Existential tier flags** threats demanding immediate action: active exploitation + no mitigations
