

Pricing Document

Socrates Mail Scanner - Digital Mail Management System for prisons and secure facilities

The cost to deploy Socrates Mail Scanner varies depending on the size of each establishment, the number of devices in use, and the existing infrastructure in place.

Pricing is influenced by factors such as deployment volume, networking and connectivity requirements, system integration, and the level of ongoing support required.

The solution can be funded directly or structured to deliver operational efficiencies and operational savings where appropriate.

Main Solution

- Socrates Mail Scanner
- Software deployment across approved devices
- Core application and licensing
- Management and monitoring software
- Security and compliance features
- Installation and configuration
- Ongoing maintenance, updates, and technical support

Optional Extras

Secure networking and connectivity enhancements

Integration with existing prison IT or security systems

Advanced reporting and analytics

Enhanced support packages and service level agreements

Cost

The cost of Socrates Mail Scanner varies according to deployment size and service requirements.

Pricing may be structured as:

- Per device
- Per user or resident
- Per site
- Subscription-based (monthly or annually)

Longer-term contracts, volume deployments, and outright licensing options are available and may affect overall cost. The minimum contract term is one year unless otherwise agreed. All prices are provided in GBP and exclude VAT unless stated otherwise.
