

Local Government Cyber Defence

Service Description

Local Government Cyber Defence, is a response to the increasing impact of malicious cyber threats, with a forward-looking resilience based on timely advice from the UKGOV National Cyber Security Centre. This adoption will mitigate the current (and still active) cyber-attacks targeting core digital interactions with residents, businesses and staff, affect critical services, and avoid reputational damage of the Council caused by sophisticated cyber-attacks. The response is a positive narrative for today, starting with this simple measure that delivers a robust stance.
