

# FourNet Protect

## Pricing Document for G-Cloud 15

## Service Overview (Pricing Context)

FourNet Protect is a cloud-based Endpoint Detection and Response (EDR) service providing continuous monitoring, threat detection, and response capabilities for endpoint devices. The service is delivered as Software as a Service (SaaS) under G-Cloud 15 Lot 2b and is suitable for public sector organisations requiring scalable endpoint security.

## Core Service Pricing

FourNet Protect is licensed on a per-user, per-month basis. Buyers may select the service level that best meets their security and operational requirements.

### Service Tiers

| Service Tier                            | Unit             | Price (GBP, ex VAT) |
|-----------------------------------------|------------------|---------------------|
| FourNet Protect – EDR Prevent           | Per user / month | £4.00               |
| FourNet Protect – EDR Identity (add-on) | Per user / month | £2.00               |
| FourNet Protect – XDR Prevent           | Per user / month | £10.00              |

Each service option includes the features described in the FourNet Protect service definition. Add-on services may only be purchased alongside a compatible core service.

### What's Included

The FourNet Protect service includes:

- Cloud-delivered endpoint security platform
- Endpoint telemetry collection and threat detection
- Centralised management and reporting portal
- Standard security event alerting
- Access to operational documentation
- Standard support during business hours

Optional managed response services and professional services are available but are not included in the above prices unless explicitly stated.

### Mandatory Pricing Notes

- Prices are fixed for the duration of the G-Cloud 15 call-off contract.
- FourNet Protect is licensed on a per-user, per-month subscription basis.
- The service is provided as Software as a Service (SaaS) under G-Cloud 15 Lot 2b.
- End-user devices and operating systems are customer-provided and are not included in this pricing.
- Internet connectivity and identity services are customer-provided unless otherwise agreed.
- Professional services, onboarding, and enhanced managed security options are priced separately.
