

Pricing for Kykcloud

Kykcloud is a mobile surveying application, with pricing based on:

- Base Hosting Fee
- Commercial Model Rates
- Training & Implementation
- Survey Management Service

All rates are quoted in GBP.

Annual Subscription Fee

The annual subscription fee and appropriate functionality are based on the particular needs of each client. Kykcloud's Base Hosting Fee is £3500 per year, includes a personalised web portal, software hosting, data storage, and premium phone and email support with unlimited users of the web portal.

Further pricing is determined on a per-client basis. Kykcloud offers a range of commercial models to suit your specific project, ranging from one-time data collection services to multi-year capital planning management contracts. Gordian will work with your team to determine the most appropriate commercial model for your needs.

Professional Services Fees - Implementation Approach

We offer a full range of both standard and bespoke professional services to ensure our clients are successful using our software solutions. We understand that each client has unique needs, and a key part of our implementation methodology involves thoroughly scoping each client's needs in detail and developing an opportunity plan which reflects these unique needs.

The overall cost, length and complexity of the opportunity, as well as the schedule and other deliverables, will vary based on a number of factors. Chiefly, which specific services each client requires, but also client resource availability, condition of current customer data, required integrations, required training and other considerations.

All opportunity deliverables will be carefully defined in a Scope of Work (SOW) document prior to kickoff, and the schedule will be defined to accomplish the deliverables outlined in this formal SOW document.

Again, our pricing approach is highly consultative. We will scope each client's needs in detail and recommend a service offering and associated pricing based on a thorough understanding of those needs. Note that these services are an additional cost to the software solutions described above.
