PURPLE TEAM SERVICE OVERVIEW

The Cybanetix Purple Team Service combines the expertise of red-team penetration testers with blue-team engineers and SOC analysts. It validates the effectiveness of security monitoring functions, driving continuous improvement in detection, response, and overall cybersecurity posture. The service includes key actives to identify vulnerabilities, test controls, validate telemetry, alerts, and escalation processes, and to recommend actionable improvements.

SERVICE HIGHLIGHTS

Red Teaming

Internal & external penetration testing of assets, applications & infrastructure. Identify & document exploitable vulnerabilities & misconfigurations

Blue Team Validation

Assess and validate customers detection and response capabilities including; telemetry coverage, alerting, escalation & incident handling and verify SOC effectiveness against simulated attacks.

Reporting

Detailed findings report highlighting high, medium and low risk issues, including missed threats and monitoring weaknesses. Prioritised detection & gap reports based on risk and potential business impact.

Continuous Improvement Plan

Long-term improvement plan to enhance security monitoring Post-engagement validation of implemented fixes

KEY BENEFITS AND OUTCOMES

Improve Detection & Response

Proactively identify and remediate blind spots Optimise incident handling, escalation, and triage processes

Risk Prioritisation

Clear understanding of which vulnerabilities and gaps pose the greatest business risk.

Continuous Improvement Loop

Ongoing iterations help teams adapt to new threats and improve processes.

Validates Security Investments

Confirms that logging and monitoring tools are operating effectively. Validate SOC service quality and performance

Service Hours

Purple Team activities are provided Monday to Friday, 9:00 AM to 5:00 PM, excluding bank holidays. The engagement and all associated activities are expected to be conducted consecutively as a single, continuous period, scheduled at a mutually agreed time
