Contractor onboarding made simple

Welcome to tifo

Our intuitive software and expert support team will streamline your candidate screening and onboarding process. We assist complex and fast-moving businesses to ensure smooth transitions, even amidst exponential growth - saving you time, minimising your risk and ensuring a market leading candidate experience.

More compliant. Less hassle.
Onboarding made simple.

Contractor onboarding

Manage your compliance obligations easily and simply with our scalable, end-to-end compliance solution. It's completely auditable and all managed from one simple dashboard.

Tifo Comply

Contractor onboarding demands specific agency and client checks in order to build a compliance profile. With our cloud-based software and integrated ID and background checks, the onboarding journey follows a simple visual workflow.

It's a truly robust solution - documents can be uploaded by the contractor or by the agency. The information is then verified automatically or via the agency's compliance team, depending on the nature of the check. You can even outsource the chase-up process and verification of documents to the Tifo team.

Tifo Comply makes managing your compliance obligations easier and quicker than ever before. It's an auditable, scalable, end-to-end compliance solution that reduces your admin burden - all from one simple dashboard.

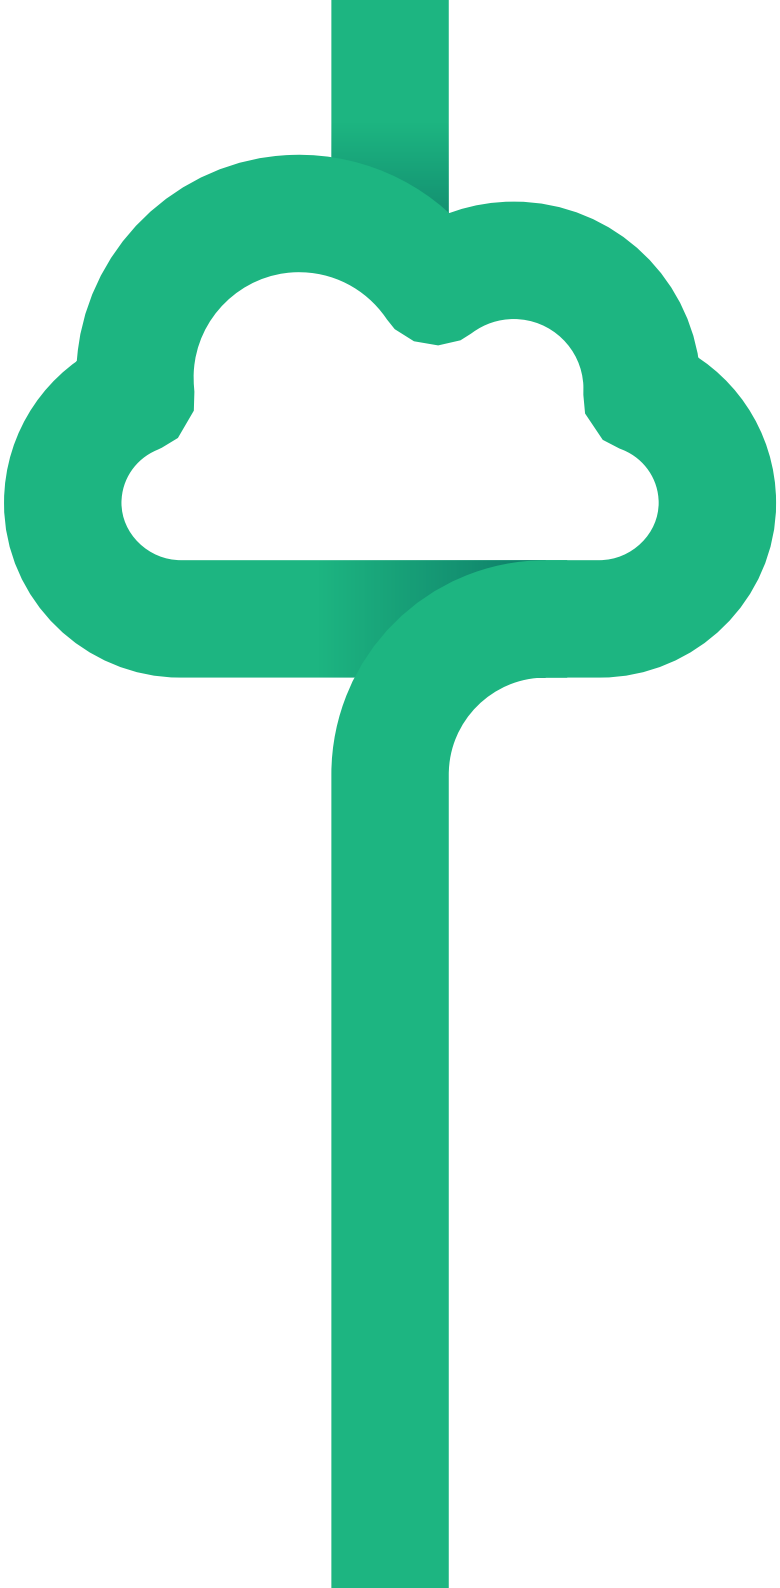

Access comprehensive checks

Over 50 different electronic ID and background checks, from passport and driving license to DBS and sanctions, are all integrated into the Tifo system so you can be confident your candidate has got everything in place for even the most complex client.

- **Referencing** - Collect references electronically. Ask candidates to explain career gaps and complete as many years history as required, all in an exceptionally easy and visual format
- **Document Signing** - Sign documents electronically, using the built in facility or integrate with your preferred document signing product
- **Client document / audit packs** - Send clients a complete onboarding audit pack with just one click
- **Integration** - Seamless integration with your CRM helps everyone have the right information to hand and we can integrate with most major providers, or even work with a bespoke system
- **Flexibility** - Tifo Comply has been built to be as flexible as you need it to be – compliance profiles can be built easily for each client and each requirement can be customised
- **Encrypted & Secure platform** - Keeping data secure is fundamental for both you and your customers. The Tifo platform is encrypted at 3 different levels to keep your data safe from even the most persistent of hackers. Access and user controls within the system allow granular control over who has access to what.

Stay in control

Tifo Comply chases your candidates and their referees so you don't need to. And because all the documents are collected for you, there's no need for external emails, spreadsheets or complicated file structures. It provides everything you would expect from a modern, cloud-based system:

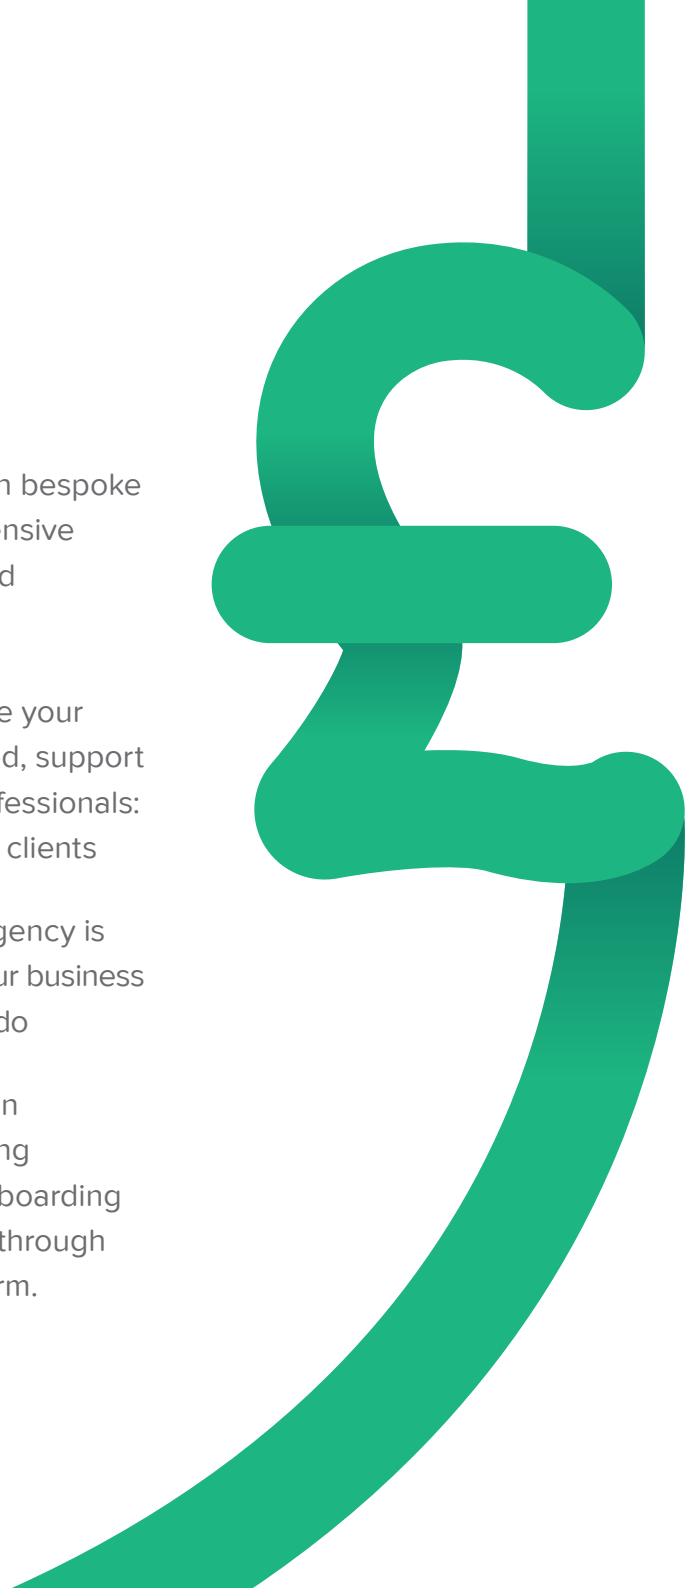

- **Shared dashboard** - The consultant, compliance manager, candidate and end client can all log into the same branded portal to complete their actions or approvals
- **Work list** - Each system user can see their individual tasks and those of their team as a whole, giving Managers insight into upcoming actions to ensure they are suitably staffed
- **In-depth reporting** - Reporting builds on the dashboards, giving you insights into every aspect of the process and team performance
- **Audit logs** - Every action has an audit log as to who did what and when
- **Individual profiles** - Candidates log into the system to complete various requirements based on compliance profiles which you have set up based on end client requirements
- **Comprehensive workflow** - The simple workflow guides them through the process ready for your sign off.

Save time and money

Streamlining your compliance processes will save you time and money:

- **Free up fee-earning time** - With onboarding under control, your consultants will have more time to do what they do best: match clients and talent
- **Self-service principles** - It's a light-touch system; contractors can enter the required information themselves
- **On-going efficiency** - Accelerate client and site clearance for contractors, and create alerts for document expiry dates and renewal requests
- **One-stop solution** - Access document verification and identity checking services all in one place, along with database integrations
- **Fully auditable** - Intuitive, detailed, real-time management information is available at the click of a button
- **Truly flexible** - Configure your own bespoke options in addition to our comprehensive suite of compliance checks (supplied upon request)
- **Outsourcing options** - Outsource your compliance process to our dedicated, support team of referencing and vetting professionals: real peace of mind for you and your clients
- **Partnership approach** - Every agency is different. We tailor our platform to your business needs; it can adapt and grow as you do
- **Smooth integration** - Our solution integrates smoothly with your existing software. Plus, you can combine onboarding with a whole host of other services through our flexible back-office cloud platform.

Making onboarding easy

It's our mission to make candidate compliance a breeze, so businesses can focus on doing what they do best. You can combine any or all of the modules to suit your business. Pay for the modules you need, when you need them, and receive a service tailored to a perfect fit.

Timesheets

Input timesheet information easily and accurately, and feel the benefit of a truly flexible system

Bill & Pay

Take away the admin of producing invoices, payroll exports and bank files
