

Pricing Models - SpatialVue™

About SpatialVue™

SpatialVue™ is an enterprise-grade WebGIS platform built on OGC standards (WMS, WFS, WPS) and compatible with leading commercial and open-source GIS engines including ArcGIS, GeoServer, MapGuide, ERDAS Apollo, MapInfo, and Deegree that supports OGC standards. It enables secure, scalable, and rapid deployment of WebGIS applications with role-based access control, advanced visualization, editing, reporting, and integration capabilities. SpatialVue™ is highly configurable and customizable without extensive reprogramming, making it ideal for organisations seeking to accelerate GIS deployment under a SaaS model.

Pricing Overview

SpatialVue™ is offered under two commercial models to address varying organisational needs:

- **Standard Edition** – Core Enterprise WebGIS capabilities for data visualization, management, and basic analysis.
- **Professional Edition** – Advanced SaaS-based Enterprise GIS with analytics, automation, mobile GIS, integrations, and extensibility.

Pricing is subscription-based (user) and scalable based on users, storage, and optional modules.

SpatialVue™ – User-Based Pricing (GBP)

Number of Users	Discount	Standard – Monthly cost per User	Standard – Yearly cost per User	Professional – Monthly cost per User	Professional – Yearly cost per User
5 – 10	0%	£60	£720	£90	£1,080
11 – 30	10%	£54	£648	£81	£972
31 – 60	20%	£48	£576	£72	£864
60 +	30%	£42	£504	£63	£756

***Minimum subscription: 5 users**

Standard Edition Includes:

- Core Enterprise WebGIS
- Data visualization & thematic mapping
- Attribute & spatial queries
- Web-based editing (basic)

- Reporting & export
- OGC services (WMS/WFS)
- Full SaaS delivery (responsive, device-agnostic)
- Role-based access control
- Basic spatial analysis

Professional Edition Includes

- All Standard Edition features plus
- Advanced spatial analytics & geoprocessing
- Background processing & task monitoring
- Advanced editing, validation & audit trails
- Metadata management & open data portals
- Mobile GIS (online/offline) – Mobile Application Development (OS Android/iOS)
- Survey form builder
- AI Model Integration for annotation
- Usage monitoring & system configuration
- Dashboards & Reports

Feature Comparison Standard & Professional Edition

1. Core Platform & General Capabilities

Functionality	Standard	Professional
