Overview

Microsoft 365 is a cloud-based suite of productivity and collaboration tools that can help you achieve more with less. Whether you need to streamline your workflows, enhance your security, or empower your remote workforce, Microsoft 365 has the right solution for you.

But how do you make the most of Microsoft 365 in your organisation? How do you ensure that you are using the best practices, complying with the standards, and maximising your return on investment?

That's where we come in. We are experienced Microsoft 365 consultants who can help you plan, implement, and manage your Microsoft 365 environment. We can help you with:

- Assessing your current situation and identifying your goals and challenges
- Designing a customised and scalable Microsoft 365 solution that meets your needs and budget
- Deploying and migrating your data and applications to Microsoft 365 with minimal disruption
- Training and supporting your staff and users on how to use Microsoft 365 effectively
- Monitoring and optimising your Microsoft 365 performance and security
- Providing ongoing maintenance and updates to keep your Microsoft 365 up to date and secure

About us

Our history

For the last decade, we have been helping organisations across UK central and local government, multi-national organisations, FTSE 100 companies, some of the oldest and well-known charities as well as countless other customers get the most from their Microsoft 365 investments. Through these projects we have developed and refined a proven delivery approach that we successfully adapt to any organisation – whether it's for a workforce of 500 employees or 25,000.

Why us?

Based on our experience of working with Government customers over the last twelve years, we understand your challenges and know what to look out for to help you optimise your Microsoft 365 experience, both in terms of usability and security and compliance. We are trusted partners who will help you to establish a robust and secure Microsoft 365 environment.

Microsoft 365 consultancy

Microsoft 365 is a broad collection of products and services that can be difficult to navigate or configure in a co-ordinated way. This is where we can help.

Service features

- Microsoft 365 strategic advice and guidance
- Microsoft 365 tenant review and audit
- Microsoft 365 product enablement and adoption
- Cloud readiness and planning
- Security and compliance assessment and enablement
- Endpoint management and security
- Cloud migration services

Service benefits

- Configuration aligned to Microsoft 365 best practice
- Implementation of robust security and access controls
- User-centric design
- Enabling Microsoft 365 cloud adoption
- Implementation of governance
- Alignment to defined information architecture

Pricing

The Skills Framework for the Information Age (SFIA) rate card will be used to calculate the price for your bespoke user needs and solution requirements.

Fixed price solutions can also be provided as required and will be calculated using the SFIA rate card.

All rates and charges within the pricing document and SFIA rate card are exclusive of VAT.

Where required, travel and subsistence expenses are charged to the customer at cost price.
