Threat Hunting Assessment

Threat hunting is a purposeful and structured search for evidence of malicious activities that have not yet generated security alerts. It's a human-centric activity that pushes the boundaries of automated detection methods.

Our Service

The Bridewell Threat Hunting Assessment will identify evidence of malicious activity within your network. Using our compromise assessment, we will carry out an objective audit of your network and endpoints.

The Threat Hunting Assessment is underpinned by Microsoft XDR technology that will detect cyber attacks that first line of defence antivirus software has most likely missed. It will leverage targeted threat intelligence unique to your organisation, as well as utilising techniques to discover commonly used attacker tactics, TTPs and commodity malware.

The service includes discovery of previously unknown vulnerabilities, security breaches, malware, signs of unauthorised access and clear pragmatic advice for remediation.

Let Bridewell help you gain unparalleled insight into your network's strengths and weaknesses, reduce your organisation's attack surface, and maximise existing Microsoft investment whilst reducing 3rd party security spend.

Threat hunting is highly complementary to the standard process of incident detection, response, and remediation.

Service Benefits

- Discovery of previously unknown vulnerabilities, security breaches, malware, and signs of unauthorised access
- Clear pragmatic advice for remediation
- Gain unparalleled insight into and understanding of your network's strengths and weaknesses
- Reduction of your organisation's attack surface
- Maximising Microsoft investment and reducing 3rd party vendor cost
- Strengthening and improving your cyber security capability to identify, protect, detect, respond and recover against modern threats and attacks
- Access to our CREST certified threat hunting consultants and CTI team. A full report, including an executive summary of our findings and technical details of actions performed.

Our Approach

Bridewell will work to discover vulnerabilities, malware, signs of breach and unauthorised access and other threats across your entire IT landscape.

Protection and remediation actions will be prioritised for all discovered threats, giving stakeholders an easy to follow approach for removing threats and providing lessons learnt.

We will then investigate and document the threat, rationalising the facts about the discovered vulnerability and how it can be remediated in the short and long term.

Remediation solutions from Bridewell to assist with resolving the vulnerabilities and putting your organisations cyber security posture on the right path whilst maximising your licensing investment.

About Bridewell

Bridewell is the trusted cyber security partner for organisations operating within Critical National Infrastructure (CNI), as well as companies who want the highest standard of cyber security. Our team are highly accredited by major industry bodies and have extensive experience of delivering cyber consulting and managed security services across highly regulated sectors. As a long-standing Microsoft partner, our team are experts in maximising the effectiveness of Microsoft Security technology to deliver robust and effective solutions.

We have a deep understanding of the challenges faced by CNI organisations and how to resolve them. We work in continuous partnership with our clients to implement the right security solutions to defend and protect them against threats and attacks, allowing them to continue operating safely and securely.
