

Cloud Security Posture Assessment

Multi-cloud Assessments Covering:

Secure your organisation's cloud environments and safeguard users, devices, and data. Our cloud security consultants perform posture assessments so organisations can unlock the full potential of the cloud without putting their business, users or data at risk.

Common Challenges

Cloud Posture Constantly Evolving

Cloud environments have new features at a rapid rate, making it difficult to maintain best practice whilst maximising new capabilities.

A Steep Learning Curve

New features in the cloud often require additional knowledge if they are to be implemented correctly without business disruption or degradation to services.

Limited Resources or Skills

In-house security teams can be overwhelmed by the number of updates in their cloud environments, especially if they are already tackling 'firefighting' activities.

Low Return on Investment

Organisations not using all available cloud features in their cloud environments can rarely maximise their return on investment.

How Bridewell Can Help

Identifying the Key Risks

Bridewell can assist in identifying key security concerns within your organisations cloud platforms.

Prioritised Remediation Plan

Bridewell can assist with prioritising the remediation of the security concerns, ensuring efficient use of time.

Proven Methodologies Best Practice

Bridewell can provide insights into best practice for deployments, based on experience of delivering the UK's largest deployments of Microsoft security technologies.

Independent Tracking of Your Security Configuration

Bridewell can evaluate your progress against previous benchmarks to support with future planning.

Improved Return on Investment

Bridewell shall provide guidance on effectively utilising all Microsoft security solutions available under your current licensing to mature your security posture.

Schedule a Consultation With Our Team

Discuss your organisation's cloud security challenges and goals with our team to see how Bridewell can enhance your cloud security posture.

Identity and Access Management

- Single Sign on and Self-Service Reset
- Multifactor Authentication
- Conditional Access
- Privileged Access Management
- Identity Governance
- Active Directory Identity Protection

Endpoint Management

- Mobile Application Management
- Mobile Device Management

- Data Discovery
- Data Classification
- Data Loss Prevention
- Insider Risk Management
- Device Encryption
- Secrets Management
- Information and Messaging Encryption

 Threat Protection

- Endpoint Detection and Response
- Endpoint Protection Platform
- Forensic Tools
- Intrusion Prevention System
- Threat Vulnerability Management
- Anti-phishing
- User and Entity Behaviour Analytics
- Threat Intelligence Feeds
- App and Browser Isolation
- Attachment Sandboxing
- Application Control
- End-user Training
- Network Firewall (URL Detonation)
- Host Firewall
- Secure Email Gateway
- Security Assessment
- SIEM
- SOAR
- Incident Response Services
- DDoS Protection
- IoT Protection

Cloud Security

- Cloud Access Security Broker
- Cloud Security Posture Management

About Bridewell

Bridewell is the trusted cyber security partner for organisations operating within Critical National Infrastructure (CNI), as well as companies who want the highest standard of cyber security. Our team are highly accredited by major industry bodies and have extensive experience of delivering cyber consulting and managed security services across highly regulated sectors. As a long-standing Microsoft partner, our team are experts in maximising the effectiveness of Microsoft Security technology to deliver robust and effective solutions.

We have a deep understanding of the challenges faced by CNI organisations and how to resolve them. We work in continuous partnership with our clients to implement the right security solutions to defend and protect them against threats and attacks, allowing them to continue operating safely and securely.
