

Vulnerability Management Service

Vulnerability management is a complex problem that requires a mixture of technical, communication, and relationship skills to achieve success. We can help address common problems that cause many vulnerability management programs to fail or stall, thereby mitigating the risks and potential harm.

Common Challenges

Incomplete Identification

Vulnerability and asset identification is often limited to one-dimensional scanning, resulting in low coverage, gaps and misrepresented vulnerability levels.

Poor Communication

Generic reports are often ignored, hindering your business needs and damaging confidence in your vulnerability management program.

Prioritisation Misaligned

Risk is subjective and priorities differ across businesses. Using a one-size-fits-all approach can cause your organisation to struggle with prioritising vulnerabilities and result in vulnerability fatigue.

Stagnated Remediation Efforts

Organisations often lack dedicated vulnerability management resources to drive remediation efforts and build lasting relationships. This leads to inconsistent and often stalled remediation efforts that increase risk.

How Bridewell Can Help

Broaden Identification

We'll close gaps in your vulnerability and asset identification by integrating with other managed services, including attack surface visibility.

Aligned Prioritisation Model

We'll work alongside you to develop a tailored prioritisation model that addresses your specific organisational risks and vulnerabilities.

Enhanced Reporting

Our reporting provides greater insights and clear storytelling that is relevant to your business needs. We also enhance our reporting with real human analyst insights and advice.

Dedicated Vulnerability Management Experts

Our experts understand your stakeholders and business, delivering a vulnerability management program with great service and strong relationships.

Drive Remediation Activities

We build and improve relationships between stakeholders and your vulnerability management program to target the vulnerability backlog and tackle the highest risk vulnerabilities with lower effort.

Vulnerability Management as a Service

Identification

- Continuous vulnerability scanning
- Asset identification
- Attack surface vulnerability identification
- Web application scanning
- Cloud scanning
- Custom asset context ingestion

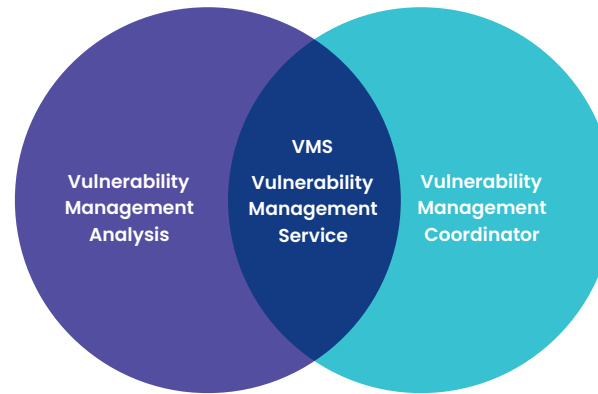

Analysis

- Root cause analysis
- Risk based vulnerability prioritisation
- CTI enrichment
- Data correlation across other managed services

Coordination

- Single point of contact
- Dedicated vulnerability management resource
- Build stakeholder relationships
- Communicate vulnerability reporting
- Help facilitate remediation efforts
- Advise vulnerability management program improvements

Reporting

- Custom reports and charts
- Vulnerability notifications & alerts
- Trending reports
- Drill-down reporting
- Ad-hoc reporting
- Monthly SLA reports
- Data exporting

Treatment

- Remediation tracking
- Exception tracking
- Remediation workshops
- Remediation advice and guidance
- Risk mitigation advice

About Bridewell

Bridewell is the trusted cyber security partner for organisations operating within Critical National Infrastructure (CNI), as well as companies who want the highest standard of cyber security. Our team are highly accredited by major industry bodies and have extensive experience of delivering cyber consulting and managed security services across highly regulated sectors. As a long-standing Microsoft partner, our team are experts in maximising the effectiveness of Microsoft Security technology to deliver robust and effective solutions.

We have a deep understanding of the challenges faced by CNI organisations and how to resolve them. We work in continuous partnership with our clients to implement the right security solutions to defend and protect them against threats and attacks, allowing them to continue operating safely and securely.
