PIPELINE MANAGER

A better way to manage your procurement pipeline and to remain compliant with the new procurement regulations.

Oxygen Finance is trusted by:

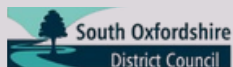

South Tyneside Council

WARRINGTON
Borough Council

Derby City Council

Standard Licence

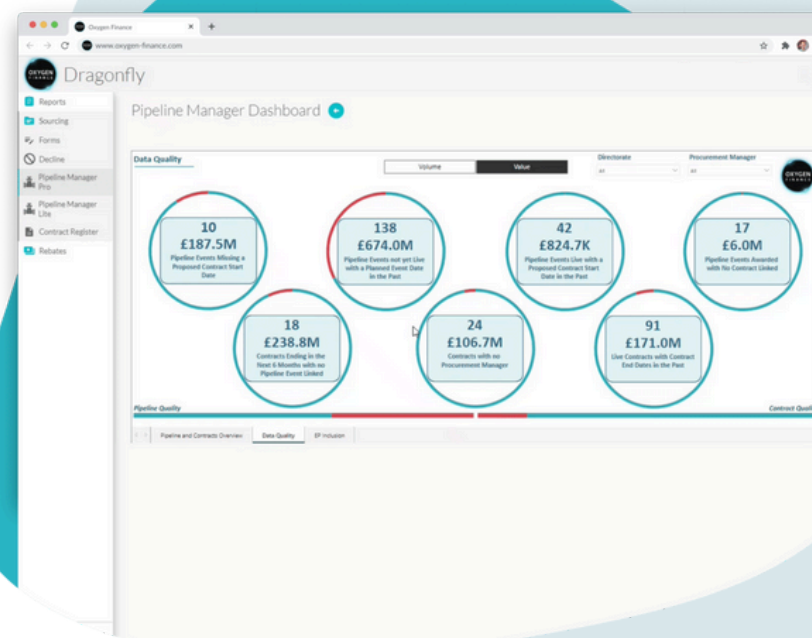

Pipeline Manager is designed to give authorities complete control of their procurement pipeline and is fully compliant with the Procurement Act 2023 and aligned with the National Procurement Policy Statement.

A standard subscription includes:

- 20 administrator licences
- Unlimited read-only licences
- 10 Custom Pipeline Manager Fields
- 10 Custom Contract Register Fields

Implementation Fee

Oxygen will provide 5 days of implementation effort covering project management, technical configuration and data loading. This includes a joint kick-off / design meeting and a training session once implementation is complete. The Contracting Authority will complete a template of design decisions and return it to Oxygen once complete, then create and roll out their own procedure rules.

Additional Service Options

You have the option to customise your package by increasing the number of licences as well as bolting on additional services.

Additional service options include:

Managed Service

Managed Service will be provided by Oxygen Finance with the objective being to ensure that the contracting authority's pipeline data is maintained in the Pipeline Manager platform in an accurate and timely manner. This will ensure data availability and accuracy for both internal use and external transparency publication purposes.

Data Validation

Oxygen to undertake data validation and load. Oxygen to collate current spreadsheets, validate against agreed rules, correct formatting, fill in missing information etc prior to loading into the tool. To include population of category taxonomy (using Oxygen Insights categories) if required.

Custom Data Field / Change Request

Additional custom data fields can be specified and created based upon the requirements of the contracting authority.

Additional Implementation Support

Data validation support is available at an additional cost.

Pricing Options

You have the option to customise your package by increasing the number of licences as well as bolting on additional services.
