

SureCode Proof of Address Verification

Pricing Document for G-Cloud 15

All pricing is exclusive of VAT, which will be charged at the prevailing rate of 20%. Prices apply for the duration of the framework unless otherwise agreed at Call-Off.

Service Overview

SureCode provides clients with **real-time proof of address verification** using live UK utility data – electricity (and gas, pending) with coverage across **Great Britain**. The service verifies address information provided by individuals by validating utility account data supplied directly by the user or derived from utility bill information.

Verification can be performed using one or more of the following data points:

- Utility account number
- Meter Serial Number (MSN)
- Utility supplier
- Contract start date

Usage data may also be provided where required and subject to availability.

SureCode supports both **residential and commercial addresses** and functions as a **“liveness” check for proof of address**, confirming an active, current relationship between an individual and a specific address. The service can operate **as a standalone check** or alongside existing credit bureau or identity verification data sources.

Commercial in Confidence

Prices exclusive of VAT. Subject to confirmation at Call-Off.
