- **ABACUS Core**
- **Unlimited** 'objects'
- **Standard** support
- **ABACUS Intelligence (AI)**
- **1** Accelerator

Starting at - GBP £94,900 p.a.

Enterprise

- **50** Modelers
- **250** Editors
- **5000** Collaborators
- **ABACUS Core**
- **Unlimited** 'objects'
- **Standard** support
- **ABACUS Intelligence (AI)**
- **2** Accelerators

Starting at - GBP £195,900 p.a.

User License Types

Empower the whole Enterprise - Streamline collaboration, ensure compliance, and maximize value

Collaborator

Increased Visibility

These users can interact with and view Enterprise dashboards and visualizations, search and query the entire repository and comment / collaborate on content. However, they are not able to edit metadata or diagram.

Editor

Edit & Maintain

These users are able to edit and maintain data within the repository directly from their browser – helping to keep data up-to-date and accurate.

Editors have the full functionality of Collaborator plus Metadata Management in catalogs.

Modeler

Full Diagramming, Editing & Reporting

These users have access to advanced diagramming functionality as well as being able to add, remove and rearrange layouts.

Modeler's have the full functionality of Editor plus Diagramming.

NB: Each User License Type can have the Administrator (i.e. permissions management) and/or Configurer (i.e. metamodeling) capability added.

User License Types: Feature Comparison

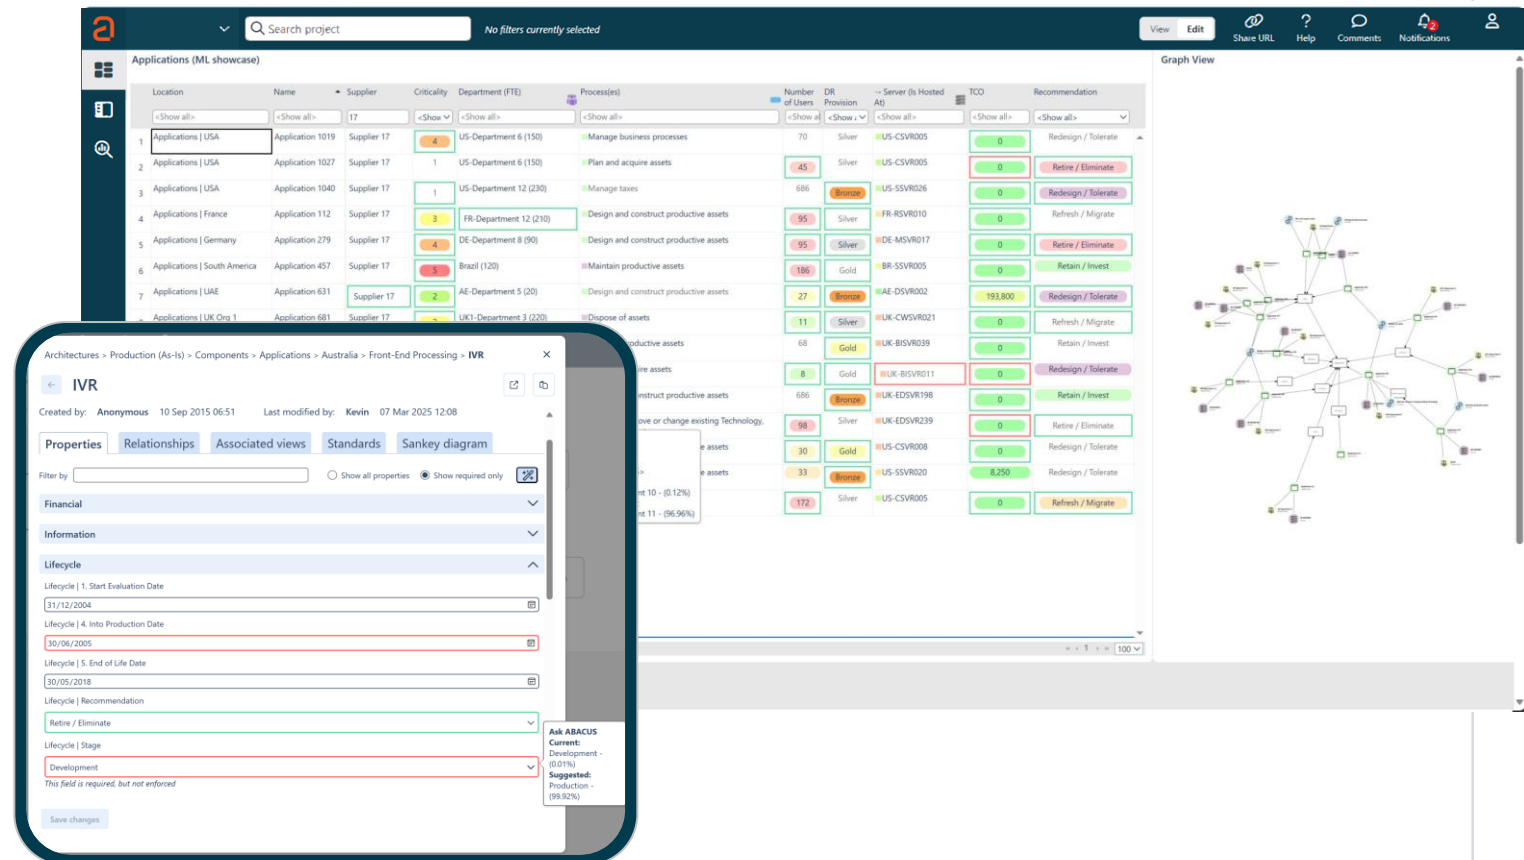

ABACUS Features & Functionality	ABACUS User Types		
	COLLABORATOR	EDITOR	MODELER
DASHBOARDS			
View online dashboards incl. digital operations, KPIs, timelines. Use filtering to zero in on data	✓	✓	✓
Commenting and tagging to engage relevant stakeholders and information owners in the discussion	✓	✓	✓
Embed dashboards in digital workplace environments and collaboration tools	✓	✓	✓
Create and edit online dashboards		✓	✓
CATALOGS (data tables which can be queried)			
Export, view, sort and filter catalogs	✓	✓	✓
Create catalogs: drive decisions by selecting property subsets and connected components to uncover insights		✓	✓
Easily import, edit and add data in browser-based catalogs		✓	✓
Machine learning and AI for data completion and prediction		✓	✓
DIAGRAMMING & VISUALIZATIONS			
View diagrams, visualizations, charts, matrices etc.	✓	✓	✓
Use Gantt Charts for monitoring timelines, key dates for projects, technology lifecycles, risks etc.	✓	✓	✓
Navigate through your interconnected database with Graph View (Dependency and Impact Analysis)	✓	✓	✓
Drill down into data with heatmaps for granular level information	✓	✓	✓
Real-time collaboration on diagrams and visualizations		✓	✓
Create and edit online visualizations including use of custom shape libraries (AWS, Azure, etc.)			✓
Create and edit online diagrams via drag/drop			✓
Build scenario-based views and toggle between architectural states (past, present, future)			✓

ABACUS Intelligence: Forecasting, Recommendations, Anomaly Detection

ABACUS Intelligence

- Domain Specific & Predictive AI/ML
- Closed and secure system
 - Important for highly regulated enterprises & governments
 - Continuously learning from the enterprises own data & business context
 - Not trained on external copyrighted content, but on highly relevant proprietary data
- Tunable
- Forecasts likely values / components / scenarios
- Helps architects plan future state

Support & Success:
