Pricing Document

Artificial Intelligence (AI) as a Service

The outline prices for the Artificial Intelligence (AI) as a Service are annual license prices and are illustrated below. These prices include technical support via telephone and email.

There are a significant number of different variables that organisations have in their requirements for an analytical system of this nature, eg number of inputs and outputs, any types of third party systems, number of interconnected sites etc. Due to this the prices illustrated below are illustrated in a range and specific pricing can only be provided once the specific requirements of each individual organisation can be determined.

User Type	Description	Price Range per User (based on requirements)
Tier 1	User has basic permissions to operate the system	£1,000 - £5,000
Tier 2	User has normal permissions to operate the system	£3,000 - £8,000
Tier 3	User has advanced permissions to operate the system	£8,000 - £12,000

The Artificial Intelligence (AI) as a Service is granular in the configuration of the workflow and in the roles and permissions of the users. These configurations will form part of the specific requirements of each individual organisation.

Please contact us for a quotation based on your specific requirements.
