HaemoSys® Clinical Decision Support System

About Us

Advanced Expert Systems Ltd was originally founded in 1989 to bring the benefits of Artificial Intelligence (AI) systems and solutions to real world challenges. Now known as AES Group Ltd, we have become a leading provider of critical defence, healthcare and commercial information systems and solutions for over 35 years.

AES Group has operations in a number of areas and have a proven track record of successfully delivering critically reliable systems and solutions that meet the complex needs of our customers in military, healthcare and commercial environments.

As an established independent information systems and solutions provider, our reputation has been built on over three decades of successfully delivering advanced information systems and engineering projects. This is evident from our considerable track record and long-term customer relationships.

Our services are able to be individually tailored to your specific needs including the levels of configuration of systems, the types of backups and/or disaster recovery options available, the most suitable maintenance windows for your operations and the required support hours.

As part of our preliminary discussions we will determine your exact needs to allow us to configure each service to your specific requirements. In addition to the technical aspects of the service, discussions will also cover the administrative aspects such as type of onboarding/offboarding support required, user numbers, dashboards and insights, etc. These discussions will also cover the financial aspects of the service including your budget, if service credits are required, and any other core or optional requirements.

Service Overview

The UK's leading Clinical Decision Support system for Haematological Malignancy, HaemoSys® is a powerful, intuitive, effective and efficient Integrated Haematological Malignancy Tracking and Reporting System providing high level support to consultant haematologists for clinically managing patients with haematological malignancies.

Service Features

This service includes the following main features:

- System customisable pathways suggest tests to be performed on samples.
- Patient centric unified reporting, including interim reports of outstanding tests.
- Dynamically generating test request forms and electronic test requests.
- Reporting of samples/tests, using free text or structured data.
- Team workload management, including assigning teams to different test types.
- Referral system which keeps the full audit trail and history.
- Interface to laboratory information systems and third party clinical systems.
- Clinical audit showing all previous revisions of reports and tests.
- Customisable email alerts (eg. tests held/cancelled, reports created/saved).

Service Benefits

The main benefits of this service are:

- A unique, state-of-the-art service that can streamline laboratories.
- Significant increase in report accuracy and laboratory efficiency.
- Achieving Digital Pathology based on Best Practice in Haematological Malignancy.
- Minimising human error by automating steps within the investigative process.
- Significant reduction in the report life-cycle using validated structured data.
- Achieve and maintain high standards with powerful audit/search capabilities.
- The ability to attach images/scans to incorporate full Digital Pathology.
- Simplified/automated reporting process with an extremely user-friendly and customisable interface.
- Continual development/improvement of HaemoSys® to offer best service.
