Pricing Document Rapid App Development

The outline prices for the Rapid App Development are annual license prices and are illustrated below. These prices include technical support via telephone and email.

There are a significant number of different variables that organisations have in their requirements for business workflow system of this nature, eg number of inputs and outputs, any third party systems, number of interconnected sites etc. Due to this the prices illustrated below are illustrated in a range and specific pricing can only be provided once the specific requirements of each individual organisation can be determined.

User Type	Description	Price Range per User (based on requirements)
Tier 1	User has basic permissions to operate the system	£1,000 - £5,000
Tier 2	User has normal permissions to operate the system	£3,000 - £8,000
Tier 3	User has advanced permissions to operate the system	£8,000 - £12,000

The Rapid App Development is granular in the configuration of the workflow and in the roles and permissions of the users. These configurations will form part of the specific requirements of each individual organisation.

Please contact us for a quotation based on your specific requirements.
