Customisable Healthcare Clinical System

About Us

Advanced Expert Systems Ltd was originally founded in 1989 to bring the benefits of Artificial Intelligence (AI) systems and solutions to real world challenges. Now known as AES Group Ltd, we have become a leading provider of critical defence, healthcare and commercial information systems and solutions for over 35 years.

AES Group has operations in a number of areas and have a proven track record of successfully delivering critically reliable systems and solutions that meet the complex needs of our customers in military, healthcare and commercial environments.

As an established independent information systems and solutions provider, our reputation has been built on over three decades of successfully delivering advanced information systems and engineering projects. This is evident from our considerable track record and long-term customer relationships.

Our services are able to be individually tailored to your specific needs including the levels of configuration of systems, the types of backups and/or disaster recovery options available, the most suitable maintenance windows for your operations and the required support hours.

As part of our preliminary discussions we will determine your exact needs to allow us to configure each service to your specific requirements. In addition to the technical aspects of the service, discussions will also cover the administrative aspects such as type of onboarding/offboarding support required, user numbers, dashboards and insights, etc. These discussions will also cover the financial aspects of the service including your budget, if service credits are required, and any other core or optional requirements.

Service Overview

The Customisable Healthcare Clinical System is a generic system that can be customised to address specific needs in any healthcare setting (radiology, maternity, etc) and uses the power of the cloud and artificial intelligence to give healthcare professionals the tools they need to collaborate more efficiently across patient care journeys.

Service Features

This service includes the following main features:

- Patient centric unified workflows enabling team workload management.
- Referral system which keeps the full audit trail and history.
- Clinical audit showing previous revisions of reports, episodes, tests, etc.
- Automatic coding for various standards.
- Minimise errors with full automatic data validation.
- Statistical and Artificial Intelligence (AI) analysis of data for advanced Clinical auditing.
- Interface to laboratory information systems and third party clinical systems.

Service Benefits

The main benefits of this service are:

- A unique, state-of-the-art system that can streamline healthcare organisations.
- Significant increase in accuracy and efficiency of workflows.
- Minimising human error by automating steps within the investigative process.
- Significant reduction in the workflow life-cycle.
- Achieve and maintain high standards with our powerful audit capabilities.
- The ability to attach images/scans enabling digital health record.
- Simplified reporting process with an extremely user-friendly and customisable interface.

Standard Service Options

The standard service options available are as follows:

- Telephone and email support and maintenance service by our UK based support teams during normal working hours, which are 9am to 5pm Monday to Friday (excluding public holidays).
- Standard onboarding/offboarding with training provided via documentation and online training.
- This service is provided to the following international standards:
 - ISO 27001:2022
 - ISO 9001:2015
 - ISO 14001:2015
