Pricing Document

MachineCare+® Condition Monitoring Service

The outline prices for the MachineCare+® Condition Monitoring Service are based on individual units of different types of analysis conducted and are illustrated below. These prices include technical support via telephone and email.

There are a significant number of different variables that organisations have in their requirements for a condition monitoring service of this nature, eg different types of equipment, number of inputs and outputs, any third party systems, etc. Due to this the prices illustrated below are illustrated in a range and specific pricing can only be provided once the specific requirements of each individual organisation can be determined.

Type of Analysis	Description	Price Range per Unit (based on requirements)
Tier 1	Basic level of analysis	£50 - £500
Tier 2	Medium level of analysis	£100 - £1,500
Tier 3	Complex level of analysis	£150 - £3,500

The MachineCare+® Condition Monitoring Service is granular in the configuration of the analysis and in the roles and permissions of the users. These configurations will form part of the specific requirements of each individual organisation.

Please contact us for a quotation based on your specific requirements.
