

Oracle Cerner Code Upgrade Service

Code upgrades and patch releases can introduce unexpected issues. Our EPR upgrade testing services focus on impact assessment, regression testing, and clinical workflow assurance, using a risk-based approach to maintain the integrity of existing functionalities while ensuring that new features work as intended within the short window and budget.

- Reduced upgrade risk and fewer post-go-live incidents
- Faster upgrade cycles with predictable timelines
- Improved patient safety and clinician confidence
- Lower testing effort and cost through targeted automation
- Stronger compliance and audit readiness

Why Us?

- Upgrade-focused expertise across major EHR platforms
- Risk-based approach prioritizing patient-impacting workflows
- Automation-led delivery with rapid time to value
- Reusable test assets that compound value across upgrades
- Flexible engagement models aligned to your release strategy

FEATURES:

- Successfully delivered over 20 EPR code upgrades for various NHS trusts
- Complete end to end testing support for new EPR deployments
- Ready-made regression test packs reducing upgrade cycle time prep
- Pre-built regression test packs customizable to each client's requirements
- Proven strategy designed to minimize go-live risks by identifying issues early
- Highly experienced, ultra-efficient teams with a proven track record of successful upgrades
- Risk-Based Prioritization focusing on high-impact clinical areas
- Flexible service models: fully managed testing model, resource only model, hybrid model involving trust resources/teams

BENEFITS:

- Average cost reduction of 66% on testing programme
- Rapid turnaround of testing, faster deployment
- Eliminate cost of recruitment and retention
- Extended Test team benefits without overheads
- Scalable testing capability for peaks in demand
- Low cost and flexible budget according to needs
- Provides constant assurance about the state of cloud software
- Faster identification and elimination of issues
- Eliminates business risk and minimises downtime
- Improved software quality

PRICING:

The pricing model adopted for each engagement is based on the specific project requirements and can be delivered on either a time or materials or fixed price basis. Technest offers discounts on extended engagements lasting more than 6 months. Volume discounts and discounts based on total committed spend per quarter are also available.
