

Oracle Health (Cerner) Testing Services

Technest provides a broad range of cost-effective cloud testing solutions covering all aspects of Oracle Cerner Millennium EPR quality assurance including Test Management, Functional Testing, Non-Functional Testing, UAT, End-to-End Testing, RFC Testing, Resource Augmentation, Test Data Seeding, Environments Validation, Managed Test Services, Devices Testing, Reporting, Data migration etc.

- **Resource Augmentation:** Technest can provide experienced onsite or offshore resources who can be part of your team when you need a few pairs of extra hands to meet milestones.
- **Managed Testing:** We offer a fully customised testing service to manage complete test activities without the expense of large overheads and day-to-day responsibilities.
- **Regression Test Execution:** If you have regular changes in your environment, we can execute weekly or monthly cycle of change related regression testing to provide continuous assurance.
- **Test Data Seeding:** To ensure compliance with GDPR and avoid using live data for testing, we can define and create test data simulating real life scenarios in test environments.
- **Environments Validation:** With our extensive knowledge of environment issues, we can execute our specifically designed tests to identify common issues during an environment build.
- **Test Cases Validation:** We can review and validate test cases to identify and eliminate any discrepancies or issues with the test cases to ensure conformance to test specifications.

FEATURES:

- System Testing, Integration Testing, End-to-End Testing
- Regression Testing, Functional Testing, Upgrade Testing, Reporting Testing
- Streamlined Defect Management
- Available as a one-off or a frequency driven service
- Scalable - additional resources to handle peaks of testing
- Service available from EU or other locations around the world
- Extremely competitive pricing to maximise savings
- Test Environments Validation
- Test Data Seeding
- ISTQB qualified Test Resources

BENEFITS:

- Rapid turnaround of testing, faster deployment
- Extended Test team benefits without overheads
- Eliminate cost of recruitment and retention
- Reap benefits of Time zone difference
- Low cost and flexible budget according to needs
- Scalable testing capability for peaks in demand
- Provides constant assurance about the state of cloud software
- Faster identification and elimination of issues
- Improved software quality
- Eliminates business risk and minimises downtime

PRICING:

The pricing model adopted for each engagement is based on the specific project requirements and can be delivered on either a time or materials or fixed price basis. Technest offers discounts on extended engagements lasting more than 6 months. Volume discounts and discounts based on total committed spend per quarter are also available.
