

PARICO

G-Cloud 15: Service Definition Document

International Cross-Domain Interoperability Service

Parico's suitability qualified and experienced technical team can deliver and support International Cross-Domain Interoperability services. We deliver and support secure, NCSC assured, Low, Medium and High Assurance non-real-time and real-time Interoperability services across security classification boundaries.

FEATURES

- Expertise in gateway solutions with high-side and low-side user communities
- Enables information sharing with international partners
- Provides a controlled interface enabling access/transfer of information between domains
- Multi-enclave and multi-compartment-controlled information sharing with Partners Across Government
- Produce high and low-level system and solution designs
- Information is protected at rest/in transit across all domains
- Complies with the NCSC Data Import and Export architectural patterns
- Automation and Orchestration built in using Infrastructure as Code (IaC)
- Supports five eyes (FVEY) international interoperability requirements
- Connectivity and interoperability to key platforms e.g. HYPERION and ROSA

BENEFITS

- Experience of the air, land and maritime deployed operations environments
- Flexible, agile, approach to service delivery
- Track record of successful rapid capability development
- Determine compliance with GDS Service Standard
- Independent and vendor neutral
- SC and DV cleared suitability qualified and experienced technical resources
- Enables collaboration with less trusted organisations
- Provide a collaboration mechanism within complex and secure international environments
- Eliminates manual data transfer processes
- Simple integration with existing OFFICIAL and SECRET capabilities

Established in early 2018, our primary goal at Parico is to develop a positive reputation across the defence sector, as a UK SME Technology Disruptor within Public and Private Sector organisations.

At Parico, we're incredibly passionate about our people and encourage the development and growth of our engineering community. Every Parico Rockstar has the freedoms to innovate and develop the next generation of disruptive products and services for our customers.

As an SME, we're able to respond to our customers requests quickly and efficiently, embracing Agile working practices across our entire organisation.
