

PARICO

G-Cloud 15: Service Definition Document

Secure OFFICIAL-SENSITIVE Interoperability Service

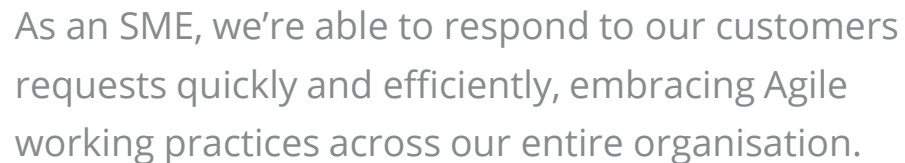

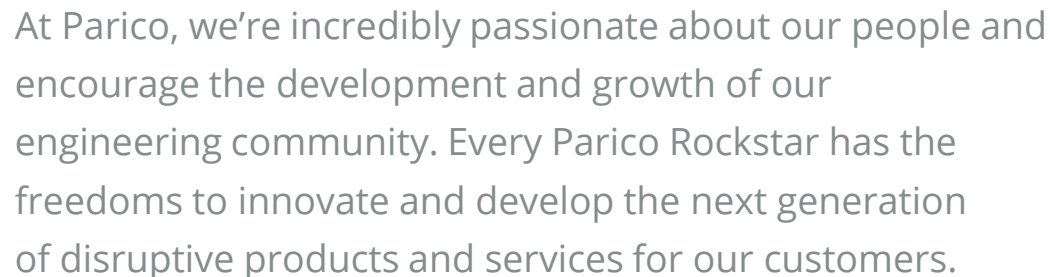

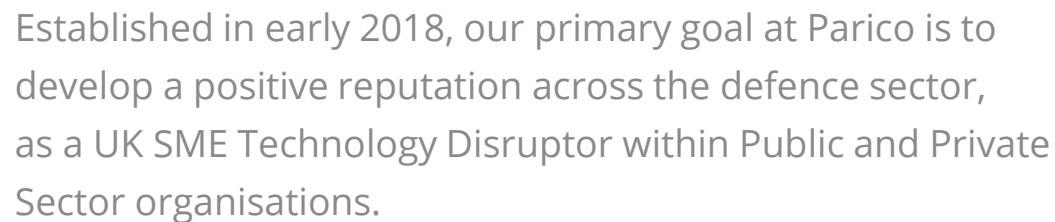

Parico's suitability qualified and experienced technical team can deliver and support OFFICIAL-SENSITIVE Interoperability services. We deliver and support secure, NCSC assured, Low and Medium Assurance non-real-time and real-time Interoperability services across security classification boundaries.

FEATURES

- Real-Time and Non-Real Time secure information sharing with strategic allies
- Integration with MODNET OFFICIAL, Office 365 and Partners Across Government
- Deployable and consumable as hosted appliance or per-user basis
- Email, Audio, Video, Collaborative-Working-Environment and PKI certificate exchange and sharing
- Complies with the NCSC Data Import and Export architectural patterns
- Data-in-transit encrypted with TLS 1.3 and Elliptic Curve ciphers
- Data-at-rest encrypted with AES-256
- Keys are stored within a Quantum-Safe Hardware security module
- Managed and supported by Security-Cleared technical cloud architects and engineers
- Supports Official-Sensitive Information Exchange (OSIE) across the public sector

BENEFITS

- NIST 800-207 compliant Zero-Trust architecture and Secure-by-Design by default
- System Administration managed through self-service Interoperability Web Graphical User Interface
- Enables collaboration with less trusted organisations
