

PARICO

G-Cloud 15: Service Definition Document

Medical Application Rationalisation and Modernisation Service

Parico's medical application rationalisation and modernisation service to support healthcare customers in transitioning and transforming business healthcare applications and data. Our service includes end-to-end application assessment, readiness review, remediation and transition/transformation with a modern and secure full stack application set.

FEATURES

- Undertake refactoring and re-development of operational healthcare applications and services
- "Fail-fast, fail-early" mindset to develop and deploy enterprise-ready code
- Establish user-base, application-usage, dormant applications and supporting infrastructure services
- Rationalise applications portfolio and develop strategy to modernise legacy applications
- Modernise outdated healthcare applications using various development languages and frameworks
- Applications and Services developed with Cloud-Readiness central to the architecture
- Decomposition of large, bulky legacy applications into individual microservices
- Experience of integrating healthcare cloud applications into existing applications/services
- Untangle technical complexity to simplify application architecture
- Application rationalisation for applications operating with personally identifiable information

BENEFITS

- Rapid development and deployment of new healthcare applications and services
- Clear understanding of Legacy Application's functionality from our application assessment
- Formulate innovative solutions to re-energise legacy applications, systems and platforms
- Excellent understanding of NHS Trust and healthcare deployed applications
- Reduced security and compliance risk through adoption of Secure-by-Design principles
- Agile approach provides benefit through early and incremental application releases
- Regular stakeholder engagement 'show-and-tell' sessions reinforces confidence
- Reduce Technical Debt and Operational Risk associated with business applications
- Follows Government Service Design Manual standards and methodologies
- Provision of Security Cleared technical cloud software architects and developers

Established in early 2018, our primary goal at Parico is to develop a positive reputation across the defence sector, as a UK SME Technology Disruptor within Public and Private Sector organisations.

At Parico, we're incredibly passionate about our people and encourage the development and growth of our engineering community. Every Parico Rockstar has the freedoms to innovate and develop the next generation of disruptive products and services for our customers.

As an SME, we're able to respond to our customers requests quickly and efficiently, embracing Agile working practices across our entire organisation.
