

Xewli Engineering Services

Service Definition

G-Cloud 15

The logo for Xewli, featuring the word "Xewli" in a bold, dark blue, sans-serif font.

Overview

Accelerate the deployment of public/private/hybrid cloud services through Xewli's cyber security experience and range of tools, including design, development and implementation services.

We provide technical expertise to define, design, and deliver solutions to meet your specific business and technical requirements. Our engineering team has a wealth of experience in designing, implementing, and supporting systems that solve complex problems. We offer guidance on the best solutions for the customers specific needs based on the wide range of available options, and support in the design and implementation of the solution.

We specialise in advanced mobile solutions, digital counter-surveillance, cross domain solutions, and machine learning.

Onboarding / Offboarding

We'll work with customers to define and validate their requirements and to determine their exact solution. The on-boarding and off-boarding process is dependent on the specific requirements of the solution, and the delivery methodology agreed upon.

Implementation Plan

We'll work with customers to define the implementation plan best suited to their requirements and solution.

Service Levels and support

Service levels and support are tailored to each customer's needs.

Termination

- By consumers: Individually agreed with each customer.
- By the supplier: Xewli will not terminate without prior customer consultation based on contractual terms.
