

Service Definition

AWS Cloud Security Strategy, Design and Risk Management Support

Supplier: Shivom Consultancy Limited

Framework: G-Cloud 15

Lot: Lot 3 – Cloud Support Services

Service overview

This service provides AWS-focused cloud security strategy, security design and security risk management support for public sector buyers.

Scope of the service

The service covers security strategy definition, security architecture design, risk assessment, threat modelling and security governance for AWS environments.

Features

- AWS cloud security strategy development
- AWS security architecture and design reviews
- Cloud security risk assessments
- AWS threat modelling support
- Security controls mapping to standards
- AWS identity and access design support
- Network and data security design guidance
- Security posture assessments for AWS
- Cloud security governance support
- Risk treatment and remediation planning

Benefits

- Improved AWS security posture
- Reduced cloud security risks
- Clear cloud security roadmap
- Better alignment to security standards
- Stronger governance and assurance
- Informed cloud security decisions
- Consistent security architecture
- Improved risk visibility
- Enhanced protection of cloud workloads
- Increased confidence in AWS environments

Service constraints

Services are delivered remotely during UK business hours unless otherwise agreed. Buyers must provide access to AWS accounts and documentation. Security tooling, AWS service costs and control implementation are excluded.

Onboarding and implementation

Onboarding includes initial discovery, confirmation of scope, stakeholder engagement and agreement of deliverables and timelines.

Service management and support

Shivom Consultancy Limited provides flexible support levels tailored to buyer needs and the criticality of the service. Level 1 provides first-line support. Level 2 provides deeper technical support. Level 3 provides specialist cloud security expertise.

Offboarding and exit management

Offboarding includes handover of documentation, knowledge transfer and support for transition to internal teams or alternative suppliers.

Security and data protection

All work follows UK public sector security requirements. Data is handled in line with GDPR and AWS shared responsibility principles.

Accessibility

Accessibility considerations follow WCAG 2.2 AA standards where documentation or support portals are provided.

Pricing

Pricing is agreed at call-off and depends on scope, duration and depth of financial and sustainability analysis required. All pricing is transparent and documented in the call-off contract.
