

FORTIS CYBER®

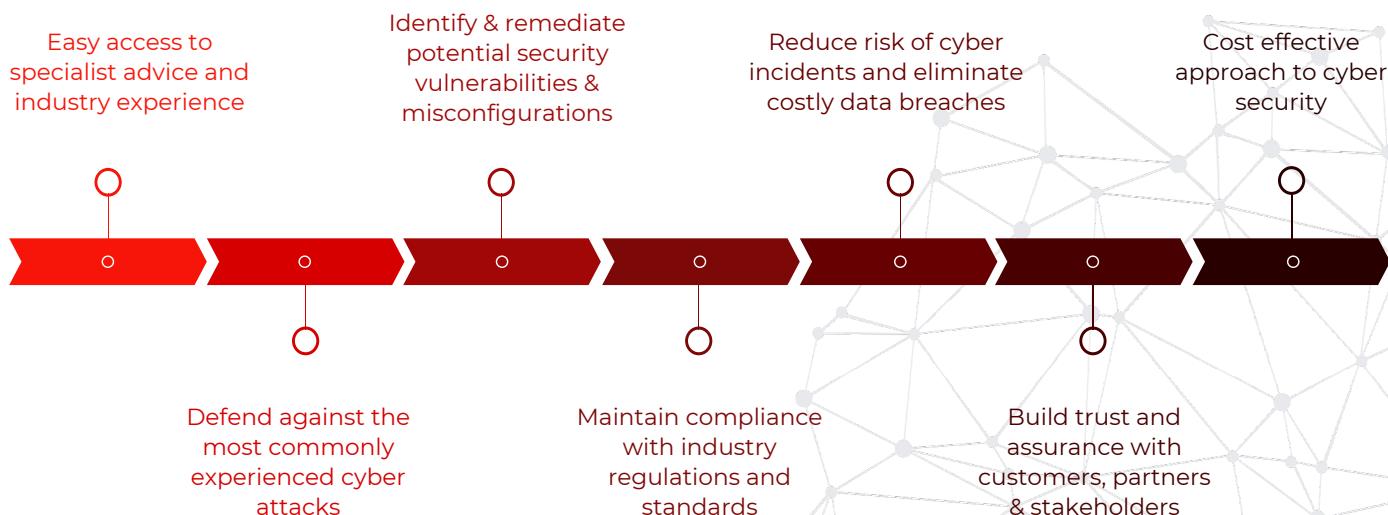

NCSC Cyber Advisor Consultancy Overview

Cyber Advisor consultancy services provide organisations with reliable and cost effective cyber security advice and practical support to reduce the likelihood of the most common types of cyber-attacks and ensure all systems and data are secure and compliant with regulatory requirements.

Fortis Cyber® is an NCSC Assured Service Provider which means our services have been independently assessed and verified under the NCSC Cyber Advisor (Cyber Essentials) scheme. The service is ideal for small and medium-sized organisations that may not have an in-house information security team or access to qualified cyber security expertise.

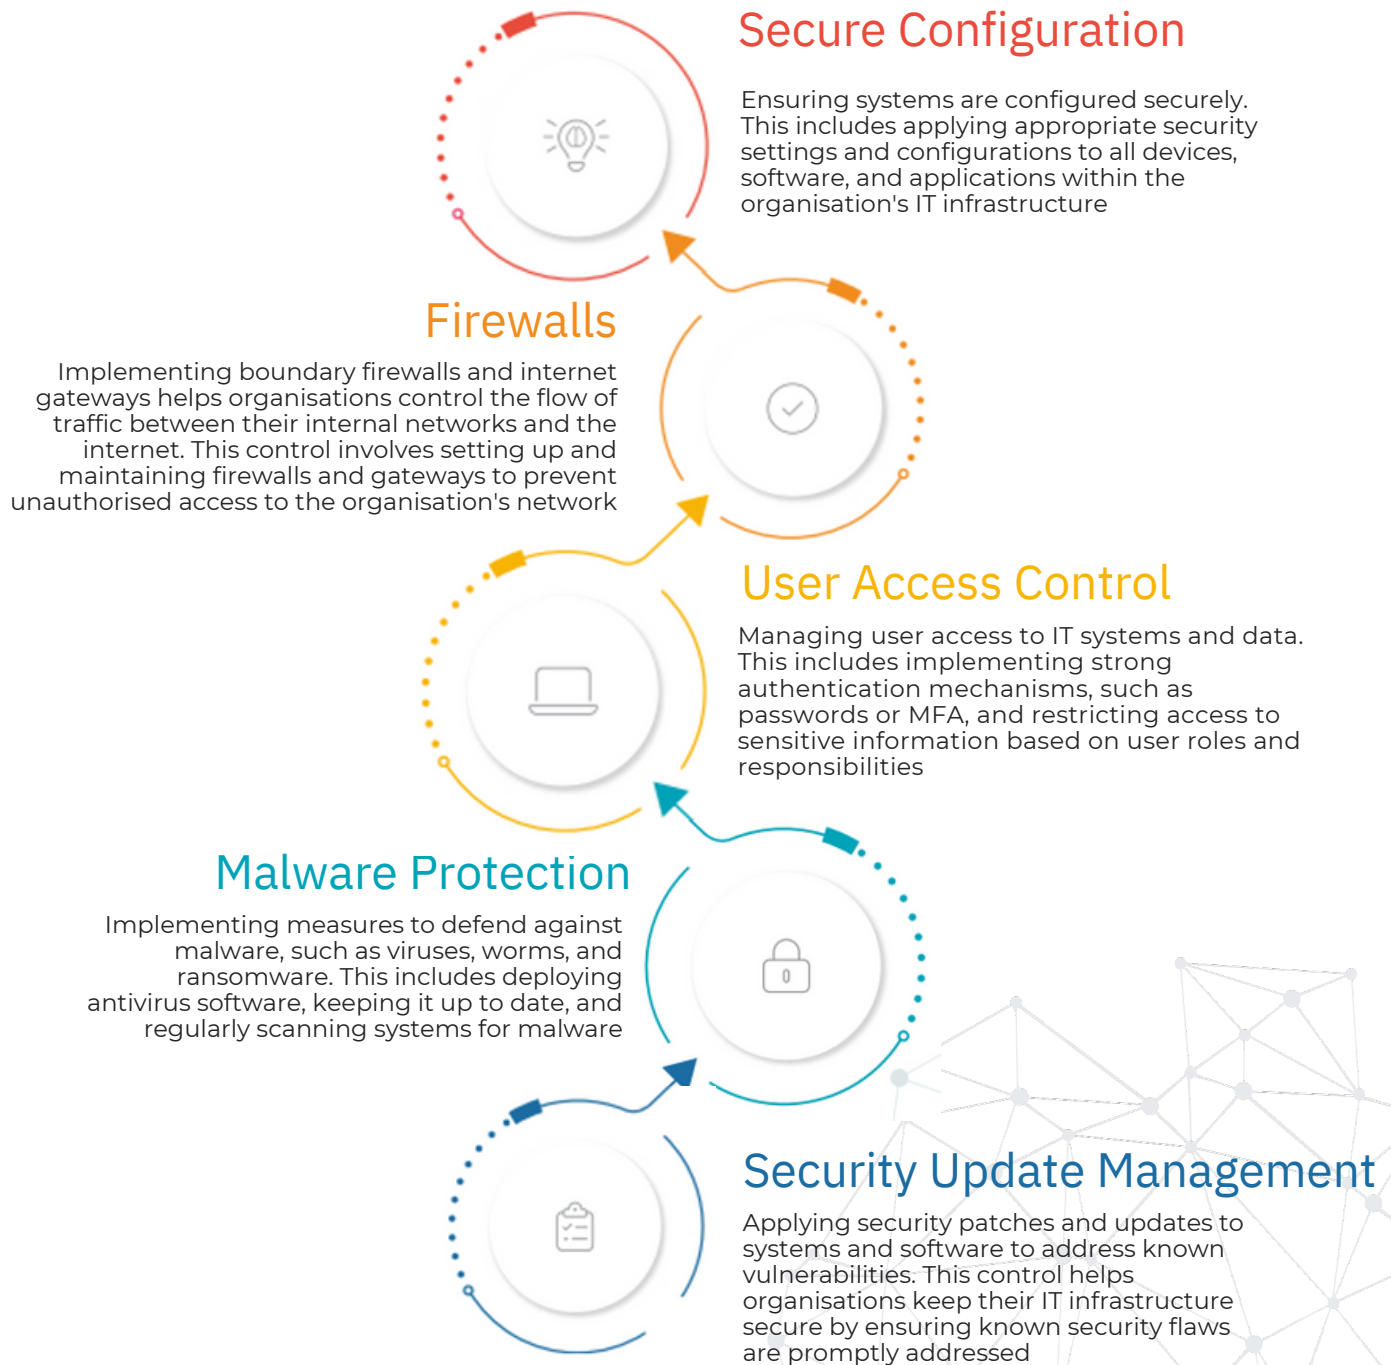

What are the benefits?

Service Features

- Expert skills and advice offered by qualified and trusted consultants
- Technical gap analysis assessment of security controls
- Clear and concise reporting and remediation advice
- Hands-on support to implement security controls and recommended actions
- Guidance on residual risk with recommendations for reducing those risks
- Help to achieve Cyber Essentials certification

Key Security Controls

Cyber Essentials Certification

Cyber Essentials is a UK Government scheme that sets out the 5 key security controls above to protect organisations against the most common types of cyber-attacks. The scheme's certification process is designed to help organisations demonstrate their commitment to cyber security best practice.

As an accredited certification body for both Cyber Essentials and Cyber Essential Plus our experienced team of specialists are highly qualified to support, assess, and certify organisations regardless of their size, sector or complexity.

For more information or to arrange a call with our team to discuss how Fortis Cyber® can support your organisation with Cyber Advisor and Cyber Essentials services visit our website www.fortiscyber.co.uk or email enquiries@fortiscyber.co.uk
