

M3Pamwin Plus Pricing

M3Pamwin Plus is provided as a fully managed Software as a Service (SaaS) solution. Pricing is transparent, scalable, and based on the number of licensed users and the agreed scope of services. The total contract price consists of a one-off initial fee in year one, an annual licence fee from year two onwards, an optional training bundle, and a variable implementation fee. All prices are exclusive of VAT.

Annual licence fee

The annual licence fee is calculated using a banded per-user pricing model. Each licensed user is charged at the rate applicable to their user band. This ensures pricing remains proportionate and predictable as organisations scale their use of the service.

Annual licence pricing per user band

USER BAND	FLAT PRICE PER USER (PER YEAR)	NOTES
1–10 USERS	£2,700	Minimum annual licence of £12,000 applies
11–20 USERS	£2,400	
21–30 USERS	£2,100	
31–40 USERS	£1,900	
41–50 USERS	£1,750	
51–75 USERS	£1,650	
76–100+ USERS	£1,600	

The annual licence fee is payable from year two onwards. Year one pricing is covered by the initial fee. The annual licence fee includes all hosting and platform costs.

Initial fee

In year one, customers pay a one-off initial fee instead of the annual licence fee. The initial fee is based on the applicable annual licence fee and reflects first-year onboarding and SaaS delivery costs.

The initial fee includes service onboarding, environment provisioning, and all hosting and platform costs. M3Pamwin Plus is delivered as a fully hosted SaaS solution, and all infrastructure, platform services, databases, monitoring, maintenance, and security controls are included. Hosting is bundled within the initial fee and is not charged or itemised separately.

Ongoing annual licence (from year two)

From year two onwards, customers are charged the standard annual licence fee only. Hosting and platform services continue to be included within the licence, with no separate infrastructure or hosting charges.

Training bundle (optional)

The training bundle is optional and may be added at contract start or renewal. It provides one training day per year for every ten licensed users, rounded up to the nearest whole day. Each training day is charged at £1,200 and may be delivered onsite or remotely.

Where selected, the training bundle cost is added to the initial fee in year one and to the annual licence fee in subsequent years. The bundled rate provides discounted access to structured training throughout the contract term.

Implementation fee

Implementation fees vary depending on customer requirements, data complexity, and the scope of configuration and training required. An implementation plan is agreed following an initial scoping exercise. Activities may include configuration, data setup, appraisal model validation, reporting setup, and role-based training.

Implementation services are delivered using a day-rate model. The first two implementation days are provided at no charge. Any additional implementation days beyond this are charged at a fixed rate of £1,500 per delivery day. The final implementation cost is calculated based on the agreed number of chargeable delivery days. Delivery effort may be adjusted by agreement where scope changes.

Estimated implementation days

Implementation effort is indicative and confirmed during scoping.

Licensed users	Estimated delivery days
Up to 10 users	12–14 days
11–20 users	18–20 days
21–30 users	23–25 days
31–40 users	29–31 days
41–50 users	32–34 days
51–60 users	35–37 days
61–70 users	38–40 days

Delivery days represent the typical on-site or structured delivery effort. Additional preparatory and configuration activity is included within the overall implementation approach.

Education Sector Discount

Qualifying educational organisations, including schools, academies, colleges, and universities, are eligible for a 10% discount against the initial fee and annual licence fees. Eligibility must be confirmed at the point of order. This discount cannot be combined with other discounts.

Additional services

Optional services such as on-site training, consultancy, or extended support may be provided by agreement and are charged separately based on scope and duration.

Indicative Year One Pricing Summary

Indicative pricing examples are provided for transparency only and final pricing is confirmed at call-off.

NUMBER OF USERS	ANNUAL LICENCE FEE (REFERENCE ONLY)	INDICATIVE INITIAL FEE	ESTIMATED CHARGEABLE IMPLEMENTATION DAYS	INDICATIVE IMPLEMENTATION COST	OPTIONAL TRAINING BUNDLE	INDICATIVE YEAR ONE TOTAL (EXCL. VAT)
10 USERS	£27,000	£54,000	14	£21,000	£1,200	£76,200
20 USERS	£48,000	£96,000	20	£30,000	£2,400	£128,400
30 USERS	£63,000	£126,000	25	£37,500	£3,600	£167,100
40 USERS	£76,000	£152,000	31	£46,500	£4,800	£203,300

All prices exclude VAT and are indicative.

The initial fee is payable in year one only and includes SaaS setup, platform enablement, and all hosting costs. No separate hosting or infrastructure charges apply. Implementation services are mandatory for all customers; the first two implementation days are provided at no charge.

For licence renewals, customers pay the applicable annual licence fee only. The initial fee and implementation costs are one-off and are not payable on renewal unless additional services are requested. Customers may choose to include the optional training bundle within their annual licence fee. Where selected, the training charge applies for the relevant year and is not included by default.
