

G-Cloud 15

CameraForensics Ember Pricing

January 2026

Overview

CameraForensics Ember is a suite of tools to run a wide range of search, analysis and clustering tools on sensitive image and video media.

Ember can be deployed as a public or private cloud service, installed on an on-premise network, or in a completely air-gapped environment.

All prices exclude VAT.

Discounts

We offer discounted SFIA rates for victim identification / crimes-against-children use (see below). We also offer discounted licences for this purpose (see relevant sections below for details).

CameraForensics Ember Licence

Software licence for CameraForensics Ember, per instance (user and processing volumes dependent on hardware capabilities (see below).

Price: **£140,000** per year (With discount for victim identification / crimes against children use: £120,000).

CameraForensics Ember Deployment

There are several deployment options:

1. For deployment within an existing media storage and processing facility we can anticipate the following non-recurring tasks:
 - a. Changes and adaptations to facilitate installation with existing Buyer-managed infrastructure;
 - b. Integration with available API's to access the resident media;
 - c. Support for initial user testing and evaluation;
 - d. Bespoke technical documentation.
2. For deployment on standalone buyer-supplied hardware meeting pre-agreed specifications:
 - a. Delivery and installation;

- b. Integration with available API's to access the resident media;
 - c. Support for initial user testing and evaluation;
 - d. Bespoke technical documentation.
3. For deployment on CameraForensics-supplied hardware:
 - a. As option 2 plus hardware cost
4. Deployment on customer-specified or CameraForensics-supplied scalable cloud infrastructure, such as AWS.

Price: This service is specific to the context for each customer. Solutions will be quoted based on the prevailing SFIA day-rate (see table below) and hardware and / or infrastructure costs.

CameraForensics Ember Support/Maintenance

Ongoing support and maintenance includes the delivery of feature updates (at the Buyer's discretion) and covers the following:

- System usage reporting at the Buyer's preferred cadence (e.g. monthly)
- Direct user support
- Support to the Buyer's process for accepting updates
- Support for testing and deployment of updates
- Curating and adding updated OSINT data in each update
- Project management

Price: This service is specific to the requirements of each customer. Solutions will be quoted based on the prevailing SFIA day-rate (see table below).

Extra services

1: Expert Training

Develops expert users and/or "train the trainer". The form of the training is in-person 1 day for 25 users (customer supplies suitable room and facilities in the UK mainland). The training covers both the use of CameraForensics, but also underlying techniques such as Exif and web-crawling. The approach will be a mix of theoretical and practical elements.

Price **£4,372.82** / session (25 max attendees), £622.75 for online equivalent

2: Bespoke Training

Development and delivery of a training course (either virtually or in-person) around CameraForensics and underlying technologies, specific to customer needs.

Price: This service is specific to the context for each customer. Solutions will be quoted based on the prevailing SFIA day-rate (see table below).

3: Specific Support

Development of bespoke analysis capabilities for delivery through the Labs framework at the request of the Buyer.

Price: This service is specific to the context for each customer. Solutions will be quoted based on the prevailing SFIA day-rate (see table below).

Standard SFIA day rates as follows:

	Strategy and architecture	Change and Transformation	Development and implementation	Delivery and Operation	People and skills	Relationships and engagement
