CameraForensics Firebreak Pricing

January 2026

Overview

CameraForensics Firebreak automates manual work that investigators currently carry out to identify potential high-risk offenders on online platforms. The system takes expert user prompts to automatically find and index profiles and associated media to prioritise users-of-interest. Key information is extracted and preserved in a local database, providing investigators with a secure way to identify and prioritise target accounts for investigation. The system is designed to significantly reduce the time and effort required to analyse online activity and improve the triage, selection and de-confliction of high-risk targets prior to operational deployment.

A number of optional extra services are also detailed in this document.

Other subscription structures are negotiable (dependent levels of customisation, expected volume of queries and data throughput).

All prices exclude VAT.

Discounts

We offer discounted SFIA rates for victim identification / crimes-against-children use (see below).

CameraForensics Firebreak Licence

- Access to the CameraForensics Firebreak service (SaaS provided via the cloud) is via yearly subscription
- The licence covers up to 100 investigators accessing a single target platform
- User access is tied to an individual's email address
- There are no additional data extraction costs

Price: **£150,000** / year

Extra services

1: CameraForensics Firebreak Customisation

Firebreak can be customised on request. This can include sourcing data from requested sites, application of specific techniques and integration with 3rd-party data sources and systems.

Price: Implementation will be quoted based on the prevailing SFIA day-rate (see table below).

2: Deployments on or Integration With Customer-Specified Systems

Deployment of a CameraForensics system to a specified host environment, including establishing mechanisms for regular data updates and associated support.

Price: This service is specific to the context for each customer. Solutions will be quoted based on the prevailing SFIA day-rate (see table below).

3: Expert Training

Develops expert users and/or “train the trainer”. The form of the training is in-person 1 day for 25 users (customer supplies suitable room and facilities in the UK mainland). The approach will be a mix of theoretical and practical elements.

Price **£4,372.82** / session (25 max attendees)

4: Bespoke Training

Development and delivery of a training course (either virtually or in-person) around CameraForensics Firebreak and underlying technologies, specific to customer needs.

Price: This service is specific to the context for each customer. Solutions will be quoted based on the prevailing SFIA day-rate (see table below).

5: Specific Support

Support to users around CameraForensics Firebreak and underlying technologies, specific to customer needs. This can include online interactive user support.

Price: This service is specific to the context for each customer. Solutions will be quoted based on the prevailing SFIA day-rate (see table below).

Standard SFIA day rates as follows:

Price: This service is specific to the context for each customer. Solutions will be quoted based on the prevailing SFIA day-rate (see table below).
