

G-Cloud 15

CameraForensics Tactical Pricing

January 2026

Overview

The CameraForensics Tactical Licence allows investigators to access and search the growing CameraForensics dataset in support of online investigations, in a user-driven fashion.

A number of optional extra services are also detailed in this document.

Other subscription structures are negotiable (dependent on crime type, use-case, expected volume of queries and data throughput).

All prices exclude VAT.

Discounts

We offer discounted SFIA rates for victim identification / crimes-against-children use (see below). We also offer discounted licences for this purpose (see relevant sections below for details)

CameraForensics Tactical Licence

- Access to the CameraForensics Tactical tool (SaaS provided via the cloud) is via yearly subscription, covering a specific crime type (e.g. victim identification / crimes-against-children, counter terrorism, etc.)
- Access to online training resources is included
- The licence covers all investigators within an organisation working on this specific investigative area or crime type (up to 500)
- User access is tied to an individual's email address
- Licence covers user-driven (not automated) access via the CameraForensics Web UI and via 3rd-party tool using the CameraForensics API (all subject to an acceptable use threshold based around user-driven use)
- There are no additional data extraction costs

Price: **£219,729.95** / year / investigative area (£104,426.33) for the child protection use case)

Extra services

1: CameraForensics Agency Platform Licence

The CameraForensics Agency Platform allows for automatic (rather than user-driven) querying of the CameraForensics dataset via API, allowing integration with existing LEA databases and intelligence assets, with proactive alerts provided when new investigative leads are available. Price is dependent on expected throughput and query-volume.

Depending on requirements, CameraForensics can provide integration services.

Indicative price: **£219,729.95** / year / investigative area (£89,122.47 for the child protection use case, or £108,706.65 for a Highside deployment for this use-case)

Integration price: Integration is specific to the context for each customer. Solutions will be quoted based on the prevailing SFIA day-rate (see table below).

2: Camera Identification Search

Provides an additional capability to match and search cameras. Requires either CameraForensics Tactical or Agency Platform. Note: Does not include a locally deployed algorithm, this is sourced separately from governments (details available on request). This is intended as a 'superuser' feature, and as such will only be made available to a subset of trained users, by agreement with stakeholders.

Price: **£339,582.65** / year / investigative area (£172,843.57 for the child protection use case)

3: Darkweb Search

Provides an additional capability to search darkweb data. Requires either CameraForensics Tactical or Agency Platform

Price: **£108,719.79** / year / investigative area

4: Additional Indexing and Search Capabilities

Provides additional indexing or searching capabilities within the CameraForensics platform, for example, crawling or ingesting specific sources of data, or specific processing and searching requirements. Requires either CameraForensics Tactical or Agency Platform.

Price: Implementation for specific data sources will be quoted based on the prevailing SFIA day-rate (see table below).

5: Deployments on Customer-Specified Systems

Deployment of a CameraForensics system to a specified host environment, including establishing mechanisms for regular data updates and associated support.

Price: This service is specific to the context for each customer. Solutions will be quoted based on the prevailing SFIA day-rate (see table below).

6: Expert Training

Develops expert users and/or “train the trainer”. The form of the training is in-person 1 day for 25 users (customer supplies suitable room and facilities in the UK mainland). The training covers both the use of CameraForensics, but also underlying techniques such as Exif and web-crawling. The approach will be a mix of theoretical and practical elements.

Price **£4,372.82** / session (25 max attendees)

7: Bespoke Training

Development and delivery of a training course (either virtually or in-person) around CameraForensics and underlying technologies, specific to customer needs.

Price: This service is specific to the context for each customer. Solutions will be quoted based on the prevailing SFIA day-rate (see table below).

8: Specific Support

Support to users around CameraForensics and underlying technologies, specific to customer needs. This can include online interactive user support.

Price: This service is specific to the context for each customer. Solutions will be quoted based on the prevailing SFIA day-rate (see table below).

Standard SFIA day rates as follows:

	Strategy and architecture	Change and Transformation	Development and implementation	Delivery and Operation	People and skills	Relationships and engagement
1. Follow	n/a	n/a	n/a	n/a	n/a	n/a
2. Assist	n/a	n/a	n/a	n/a	n/a	n/a
3. Apply	n/a	n/a	n/a	n/a	n/a	n/a
4. Enable	£1008.58	£1008.58	£1008.58	£1008.58	£1008.58	£1008.58

5. Ensure or advise	£1,144.16	£1,144.16	£1,144.16	£1,144.16	£1,144.16	£1,144.16
