

Core Transfer & Encryption

True end-to-end encryption Only the sender and recipient can ever see the unencrypted data; Hexiosec has zero visibility.	✓
Send any file type, no size limit No limits on file size or format – ideal for large documents, media, or archives.	✓
Request files via secure upload links Collect files securely from anyone.	✓
Send encrypted messages (text) Share sensitive information as encrypted messages.	✓
Recipients don't need an account Send to anyone - recipients don't need to log in. No software install required.	✓

Secure Forms, Spaces & Email

Secure Forms Request structured data securely via encrypted forms.	+
Secure Spaces Shared spaces where all invited parties can collaborate.	+
Secure Email Send fully end-to-end encrypted emails.	+

Access & Link Controls

Set expiry by time File download automatically revoked after a set period.	✓
Limit number of downloads Only allow files to be downloaded a set number of times.	✓
Revoke access at any time Instantly prevent downloads of files, even before the link expires.	✓
Add a download password Add a second-factor access control.	✓
Restrict access to named recipients Limit file access to specified email addresses.	✓
Verify recipient identity Require recipients to confirm their identity before viewing or downloading.	✓
Activity logs, download / upload audit trail Track full activity history for GDPR compliance and assurance.	✓
Notifications / alerts on activity Receive automatic alerts on uploads and downloads.	✓

Identity, Access & Auditing

Single Sign-On (SSO) integration Supports Microsoft Entra ID, Google Workspace, Auth0, and other OIDC providers.	✓
Multi-Factor Authentication (MFA) Strengthens access security for users.	✓
User management & groups Centralised management of user accounts and permissions.	✓
Audit & usage logs Comprehensive activity tracking and reporting.	✓

Integration & Workflow

Outlook integration Replace insecure attachments directly within Outlook app and Outlook on the Web.	✓
Access OneDrive & SharePoint files Share files securely from OneDrive and SharePoint.	✓
REST API / CLI automation Automate secure transfers and integrate into existing systems.	+

Support, Service & Deployment

Enterprise support & SLAs Priority support and service.	✓
Dedicated account management Named Hexiosec contact for ongoing service and support.	✓
Onboarding & training Assisted rollout and user enablement included.	✓
UK-based hosting & data sovereignty Built, hosted, and supported entirely in the UK.	✓

Scalability, Storage & Allowances

Scalable user base Designed for organisations with tens to thousands of users.	✓
Custom data allowances Scalable to meet enterprise demand.	✓
Unlimited concurrent transfers No restriction on in-flight sends or recipients.	✓

Branding, Domain & Customisation

Bring-your-own domain E.g. use transfer.yourorg.com for trusted delivery.	✓
Custom branding (logo, colours) Reflect your organisation's identity.	✓
Custom text and messaging Tailor the wording users see to suit your tone and purpose.	✓
