What is OIS Omega?

OIS Omega is a **Windows-based Virtual Desktop Infrastructure (VDI)** built for modern teams needing secure, flexible, and efficient office productivity. It separates all business activities from vulnerable local systems and networks, ensuring that your corporate operations are always protected from cyber threats—no matter where your people are working.

Who is it for?

Financial Institutions

Protect sensitive client transactions and ensure regulatory compliance with isolated, secure workspaces.

Healthcare Providers

Enable secure access to patient records and facilitate confidential telemedicine consultations.

Tech Firms & Dev Teams

Support secure development, testing, and code collaboration across distributed teams.

Consultants & Remote Professionals

Access confidential business data safely, from anywhere—even public Wi-Fi

Why Businesses Choose OIS Omega

Built for Security

All operations take place in isolated, secure virtual environments—keeping sensitive data off local devices and protected from threats.

Access Anywhere

Connect through a browser from any device. No installations, no friction—just instant, secure productivity.

Familiar Windows Interface

Your team works in the environment they know—Windows—backed by unmatched protection and seamless performance.

Optimised for Business Continuity

Even in the face of disruptions, OIS Omega ensures your operations remain active, accessible, and efficient.

Scalable & Adaptable

Whether you're a small business or a global enterprise, OIS Omega scales effortlessly to meet your evolving needs.

Real-World Applications

Financial Compliance

A national bank used OIS Omega to deploy secure remote desktops for its workforce, ensuring full encryption and regulatory adherence during remote financial operations.

Remote Healthcare

A hospital expanded its telemedicine offerings using OIS Omega, enabling secure consultations and safeguarding patient records with end-to-end virtual privacy.

Global Software Teams

A tech firm securely collaborated across time zones using Omega's non-persistent environments, ensuring intellectual property remained protected from local device risks.

Consultants on the Go

A consulting agency gave its travelling consultants browser-based access to a secure Windows workspace, boosting both productivity and data protection during client visits.
