1 INTRODUCTION

This document gives a summary of Enovation Transfer and its pricing.

1.1 Enovation Transfer

Enovation Transfer is a software application to support and simplify the patient discharge and transfer of care process between healthcare organisations like hospitals, nursing homes, home care, General Practitioners, transfer of care hubs, etc.

Enovation Transfer facilitates efficient patient transfers and collaboration between General Practitioners, specialists, geriatric medicine, and coordination personnel while replacing traditional methods like paper, phone calls and emails.

Why Enovation Transfer:

- Standardised and transparent process(es) - reduces the turnaround time of the transfer process and cost.
- Insight into actual transfer status, progress and information for all stakeholders - reduces the volume of calls, emails etc.
- One digital transfer of care record with all the required information - no information is lost, the process is paperless and reduces errors.
- Capacity tracker - improves the speed of transfers, by providing insights into capacity of providers for step-down care (outside the hospital).
- Select multiple follow-up service providers. Where a patient is rejected, the next provider in line will automatically receive the request, and so forth.
- Reduced administrative burden for all stakeholders.
- Digital collaboration via chat and communication journal - fast and direct communication between all staff involved in the Transfer of Care process.
- Management information and reporting provide visibility and help improve the process, where required.

Lastly:

- Lengthy and return hospital stays are reduced.
- Acute admissions and admissions to the emergency department can be avoided.
- Waiting lists are reduced.
- Patients will receive the right care, in the right place at the right time.

2 ENOVATION TRANSFER PRICING

2.1 Yearly subscription

The annual cost consists of 3 elements:

- Enovation Transfer subscription including hosting, maintenance, and support.
- The number of Transfer Files processed.
- Integrations with Electronic Patient Record (EPR) systems.

The number of Transfer Files are based on the current or expected number of Transfer Files on an annual basis. If, at the end of the calendar year, the number of Transfer Files deviates from the available number of files in the current subscription, the corresponding subscription rate will be determined and charged based on subsequent calculation.

Description	Price per year	
Enovation Transfer, incl.	£	7,023.00
• Transfer and discharge management • Capacity tracker • Hosting, maintenance, and support		
Transfer file bundles		
Bundle up to 2,000 Transfer Files ¹	£	40,294.00
Bundle up to 3,000 Transfer Files	£	50,080.00
Bundle up to 4,000 Transfer Files	£	66,198.00
> 4000	£	On request

EPR integration costs apply per organisation and integration. A hospital is charged a standard yearly fee. The fee for other types of organisation, such as nursing homes or home care organisations, will depend on the number of transfer files.

Enovation Transfer - EPR integration ²	# files per year	Price per integration per year ³	
Trust / Hospital			
EPR/EMR integration (SSO and patient data)	n/a	£	2,732.50
Nursing home / home care etc.			
EPR/EMR integration (SSO and patient data)	Less than 10	£	138.00
EPR/EMR integration (SSO and patient data)	10 - 500	£	691.00
EPR/EMR integration (SSO and patient data)	500 - 1,000	£	1,392.00

¹ Transfer File: any file entered by the licensee, regardless of stage or status. Deleted Transfer Files are considered to have been entered incorrectly or twice and are not counted as created files.

² Integrations are only possible if the third party cooperates. Any costs charged by third parties are not included.

³ The cost of EPR/EMR integrations apply per organisation and per integration.

2.2 Project management and implementation

The success of Enovation Transfer depends on good implementation. Below you will find a description of the work that needs to be done to implement Enovation Transfer successfully.

Stages	Definition
<i>Phase 1</i>	<i>Preparation</i>
	Mapping the current process to functionality and workflow within Enovation Transfer
<i>Phase 2</i>	<i>Configuration and integration</i>
	Onboarding of organisation and users
	Implementation of Capacity Transfer module
	Establishing standard integrations for Patient Data and Single Sign On
	Attachments integration
<i>Phase 3</i>	<i>Test</i>
	Testing the integrations and operation of Enovation Transfer in practice
<i>Phase 4</i>	<i>Training and instruction⁴</i>
	Training of the application administrators
	Training the Transfer of Care team
	Practice with the Transfer of Care team
	Instructions for users, ward nurses and (outpatient) departments

The project and implementation support required will depend on the scope. An initial implementation focused on the 'hospital to nursing home / home care' transfer process will, on average, take up to 30 Professional Service days. Additional implementation will be required per integration.

Project and implementation costs will be specified per project.

Consultancy day rate: £ 925.00 per day

All prices are in Pounds Sterling, excluding VAT and travel expenses. The travel hours allowance is £ 100.00 per hour and is invoiced on the basis of subsequent calculation.

⁴ Training takes place based on the 'Train the trainer' principle.
