TRILEC LIMITED

Electrical Contractors | Fibre & Data Infrastructure | Civil Engineering | CCTV | EV Chargers

E: Sales@trilec.uk www.trilec.uk T: 01934331820

1. Company Overview

Established in 2013, Trilec Limited is a UK-wide electrical, data, fibre, and civils engineering provider with more than 12 years of industry experience. Based in Weston-super-Mare, Trilec has grown from a grassroots business into a nationwide service partner delivering high-quality, secure, and compliant infrastructure solutions across commercial, defence, public sector, and industrial environments.

Key Highlights

- Nationwide service capability
- Skilled Data, Fibre, Electrical & Civils Team
- One-stop solution from design to installation and commissioning
- Trusted by major UK organisations and government sectors

2. Service Portfolio

Trilec Limited provides a complete range of electrical, data, fibre, and civils installation services. Our teams manage projects end-to-end, from design through delivery and commissioning.

Core Services

1. Data & Fibre Installation

- Internal and external structured cabling
- Fibre optic installation, splicing & testing
- Cat5e, Cat6, Cat6A, and specialist cabling
- Cabinet installation and termination
- Data centre cabling and containment

2. Electrical Installations

- Power distribution systems (including but not limited to Data centre power, power filters, Ups, Generator etc)
- Lighting systems & emergency lighting
- Electrical testing, inspection & certification

3. CCTV Systems

- High-definition CCTV installation
- Networked surveillance solutions
- Secure environments including MoD and critical sites

4. Access Control Systems (Paxton Accredited)

- Door access control system installation

- Integration with security infrastructure
- Controlled facilities and secure sites

5. Civils & Groundworks

- Trenching, ducting and chamber installation
- Draw pits & BEP installations
- Concrete works, foundations & plinth construction
- External utility routes and service avoidance
- Setting out

6. Building & Fit-Out Works

- Strip-out and enabling works
- Wall construction, ceilings, flooring
- Decoration and finishing
- Fire door installation
- Secure wall construction

7. Air Conditioning Installation & Commissioning

- Full HVAC installation
- Server room and comms room cooling solutions

8. Project Management & Compliance

All projects are overseen by SSSTS/SMSTS-qualified supervisors, ensuring:

- Full compliance with health & safety legislation
- Safe system of work documentation
- Quality-driven installation and commissioning
- Clear communication and project milestone tracking

4. Locations of Operation

Although headquartered in Weston-Super-Mare, Trilec operates **across the entire UK**, delivering projects nationwide for both public and private sector clients. All locations considered UK wide and sites abroad.

5. Previous Experience

Trilec has successfully delivered work across the following environments:

- Large Data Centres (Electrical, Fibre and data infrastructure including containment, UPS and commissioning)
- Solar Farms (Civils, Electrical & Fibre)
- Ministry of Defence (MoD) Sites
- Ministry of Justice (MoJ) Sites
- Local Councils (e.g., North Somerset Council maintenance contract)
- Schools & Educational Facilities (Refurbishment works)
- Distribution Centres (Electrical, data and fibre infrastructure)
- DBI (Defence Business Internet) Projects nationwide.

6. Why Choose Trilec

MoD Ready

- Fully security-cleared and experienced for defence-related works.
- Well versed in JSP standards.

One-Stop Solution

From design, installation, testing, commissioning, maintenance.

Proven Track Record

A consistent history of successful delivery in secure, complex, and diverse environments.

Trusted by Clients

Long standing relationships and repeat business reflect the quality and reliability of our services.
