UK Customer Professional and Managed Services

Rates based on number of hours purchased.
Services can be tailored – Scope dependent

All amounts contained in this proposal are exclusive of: VAT, GST or any other similar goods and services tax; the cost of any outlays, hotel, subsistence, travelling and any other ancillary expenses reasonably incurred by the Resources CyberIAM engages in connection with this Proposal or project; and the cost to CyberIAM for any materials or services procured by CyberIAM from third parties for the provision of the Services as proposed.

Pricing Available upon Request / Scope Clarification

Professional Services (PS) and Managed Services (MS) do not follow standard pricing models because each engagement is highly dependent on the specific scope, use case, and customer environment. Every project varies in complexity, technology stack, existing maturity, and resource requirements - meaning assumptions differ significantly from one engagement to another. As a result, PS and MS offerings are priced on a case-by-case basis, ensuring that the solution and commercial model are tailored to meet the unique needs of each customer.
