Bulien is both an Authorised Professional Services Supplier & an Authorised Training Partner.

Data, Analytics & AI Services

As well as supplying cloud software, Bulien offer expert data & analytics services across a variety of platforms and specialise in how they integrate with the other systems and applications within an organisation's data ecosystem.

Consultancy days can be used for a variety of tasks from onboarding through assisting with use case development to support. Business Intelligence, Analytics, and AI platforms are inherently collaborative, and we strongly believe that this extends to the training and development side as well.

When customers get the most out of AI, data & analytics, it is typically where we've worked together (at least to begin with) to help develop the skills rapidly and to offer direction in how to approach the many data challenges that organisations face.
