

About Us

An Independent Technology Consultancy

Award-winning, carbon-negative, SME consultancy delivering top-tier digital transformation across private and public sectors, leveraging our independence to meet diverse client needs.

Technology Specialists

A passionate team with a profound understanding of technology, delivering user-centred solutions to generate lasting business impact.

From Strategy to Delivery

We guide digital transformation projects from inception to live, ensuring comprehensive support and impactful results.

Savant Labs

Savant Labs is a **cloud-native**, no-code analytics automation platform that enables organisations to streamline end-to-end data workflows, accelerate insight delivery, and reduce manual workload across analytical operations. It replaces repetitive, spreadsheet-driven tasks with governed, reusable automation and AI-assisted analytics capabilities.

The platform unifies data preparation, transformation, blending, cleaning, and automated insight generation within a single environment. Users can connect to a broad range of data sources (including files, databases, cloud applications, and business systems) via point-and-click connectors and integrate structured and unstructured data efficiently.

Using intuitive no-code & low-code tools, analysts can create repeatable workflows that automate data ingestion, transformation, and analysis without programming skills.

Built-in generative AI and agentic analytics features help generate insights rapidly and scale analytical outcomes across functions such as BI, finance, HR, supply chain, and marketing.

Savant Labs

Savant Labs supports automated delivery of analytics outputs to dashboards, business applications, communication channels, and reporting systems, ensuring insights reach decision-makers when and where they are needed.

Delivered as a secure SaaS solution, the platform supports:

- Collaboration
- Data governance
- Enterprise-grade controls

Its cloud-native architecture enables rapid deployment, scalable performance, and seamless integration with existing data and analytics ecosystems.

By automating analytical workflows and leveraging AI, Savant Labs helps organisations reduce operational costs, improve decision-making speed, and increase the value derived from their data.

Savant Labs

Savant significantly reduces the time required to prepare data and deliver actionable insights to operational and policy teams.

Savant lowers operational cost and analyst effort, replacing manual, spreadsheet-driven processes with reusable automation in the cloud.

Standardised, repeatable workflows reduce human error and ensure consistent application of data cleansing and transformation rules across the organisation.

No-code and low-code tools enable a broader range of staff to build, run, and consume analytics without specialist programming skills.

Centralised automation and governed workflows support reuse and collaboration, enabling analytics to be scaled

Delivered as a SaaS solution, Savant supports cloud-first strategies, rapid deployment, and integration with existing data & analytics platforms.

Automated delivery of insights ensures decision-makers receive timely, relevant analytics to support operational planning, financial management, and policy development.

Savant Labs

Savant Labs has several core offerings shown below, **all with unlimited users, unlimited workspaces, unlimited workflows, unlimited test runs.**

Savant Pro

100 workflow runs per annum

Savant Enterprise Platform

Small - 1,000 workflow runs per annum

Medium - 10,000 workflow runs per annum

Large - 25,000 workflow runs per annum

XL - 100,000 workflow runs per annum

Add-ons

Agentic Suite Add-on - Bring your own LLM, Vision Agent, Fuse Agent, Infer Agent

Global Support Add-on - 24x5 Global Support Hours

Data, Analytics & AI Services

As well as supplying cloud software, Bulien offer expert data & analytics services across a variety of platforms and specialise in how they integrate with the other systems and applications within an organisation's data ecosystem.

Consultancy days can be used for a variety of tasks from onboarding through assisting with use case development to support. Business Intelligence, Analytics, and AI platforms are inherently collaborative, and we strongly believe that this extends to the training and development side as well.

When customers get the most out of AI, data & analytics, it is typically where we've worked together (at least to begin with) to help develop the skills rapidly and to offer direction in how to approach the many data challenges that organisations face.

Expert Consultancy Services

We offer a broad spectrum of services relating to data and the technology vendors that we partner with.

- Strategy & Advisory services
- Guided trials
- Proof of Concept/Proof of Value
- Classroom training
- Workshop training
- Migrations & On/off-boarding
- Bespoke connector builds
- Coding, AI & ML expertise
- Design, Architecture & Governance
- Data enrichment & enhancement
- Project Management
- Implementation
- Visualisation
- Development
- Collaborative Development
- Support & Maintenance
- Agentic AI embedding & integration experience
- Public & Private LLM integration experts
