CYSIAM

> The best time to discover what's not working? When nothing depends on it.

Guided Cyber Incident Exercise (CIE)

Most incident response plans look impressive on paper but will fall apart when crisis calls. When the CEO asks "What's our plan?", you need to know that your team knows exactly what to do.

Get your crisis retaliation in first with tested communication protocols and decision-making frameworks that help you recover faster with less reputational damage.

What is a table-top exercise?

A Table-top CIE is designed to walk your team through their crisis roles via a structured discussion of a realistic crisis simulation.

We'll study roles, responsibilities, activities and key decision points in line with your Incident Response Plan, testing decisions and communication without real consequences. Perfect for building incident response confidence before facing actual pressure.

What's covered?

Executive Decision Framework

- **Key stakeholder identification and authority mapping**
  So you know who has decision-making power when minutes matter
- **Review of Business Continuity and Disaster Recovery Plans**
  To ensure your recovery strategies are realistic and your team understands their roles
- **Assessment of critical supply chain dependencies**
  To identify external relationships that could compromise your response efforts
- **Third-party coordination protocols**
  To establish clear communication channels before you desperately need them

Communication and Coordination

- **Internal and external communication protocols**
  To prevent the mixed messages that damage stakeholder confidence
- **Assessment of roles and responsibilities**
  So everyone knows their task during high-pressure situations
- **Escalation and decision-making pathways**
  To create clear and resilient chains of command

Scenario-Based Learning

- **Exercise planning and professional facilitation**
  To provide the guidance that creates realistic simulations
- **Scenarios tailored to your threat profile**
  To test against incidents relevant to your organisation
- **Structured discussion-based feedback**
  To identify gaps while there's still time to fix them
- **Detailed reporting with practical recommendations**
  To deliver specific workable improvements to your response plan
- **Executive summaries for leadership**
  The documentation to demonstrate due diligence to your board and stakeholders

EVERY organisation needs reliable, workable incident response capabilities. Table-top exercises offer a safe environment to discover and fix the gaps and challenges before they turn into costly real-world problems.
