Romano Security Consulting Virtual DPO Service Description

Romano Security Consulting delivers Virtual DPO (Data Protection Officer) consultancy services to help organisations implement, manage, and maintain effective data protection and GDPR compliance practices. We provide flexible, on-demand DPO support covering governance, risk management, regulatory liaison, and ongoing compliance without the need for a permanent in-house DPO.

Our Virtual DPO consultancy service supports the implementation, management, and continuous improvement of your data privacy, data protection and GDPR compliance practices.

With our Virtual DPO, you get a flexible and cost-effective way to meet your data protection obligations.

Instead of hiring a full-time Data Protection Officer, we provide expert guidance on demand — allowing you to focus on running your business.

Your Virtual DPO can support your management team whenever required, ensuring you meet compliance standards without the overhead of a permanent hire.

Romano Security Consulting Virtual DPO Consultancy Services

Romano Security Consulting provide DPO managed service support and advice in the following areas:

Legal Compliance and Advice

- Interpret and apply GDPR, UK Data Protection Act to company policies and processes.
- Ensure data processing activities comply with legal obligations.
- Advise on Data Protection Impact Assessments (DPIAs).
- Provide guidance on lawful bases for data processing.
- Advise on cross-border data transfers, consent mechanisms, subject access requests (SARs).

Data Protection Officer Services

- Act as your officially designated Data Protection Officer (DPO).
- Serve as a point of contact for regulators (like the ICO) and data subjects.
- Monitor internal compliance and audit data handling processes.

Policy and Documentation Support

© Romano Security Consulting Ltd

- Develop or review privacy policies, data retention policies, breach notification procedures, etc.
- Establish a tailored privacy framework for your business.

Training and Awareness

- Deliver staff training on data protection principles.
- Ensure employees understand their responsibilities when handling personal data.

Data Breach Response Support

- Detect, assess, and respond to data breaches.
- Determine whether breaches must be reported to the ICO.
- Support with communication and remediation.

Risk Management

- Conduct audits, risk assessments, and DPIAs.
- Identify and mitigate risks in personal data processing.

Vendor and Contract Review

- Review data processing agreements (DPAs) with third parties.
- Ensure suppliers meet data protection requirements (especially in cross-border transfers).

How does our Virtual DPO Managed Service work?

Tailored Solution

Romano Security Consulting tailor our DPO consultancy service to fit the individual needs of your business and mitigate the data protection risks that you face as a business.

Scoping

The first stage of the service involves a scoping exercise, so we can get the right level of managed DPO service to match your business requirements.

Gap Analysis

We then conduct a gap analysis to identify your key data protection risks, threats, and vulnerabilities, provide you with a detailed strategic roadmap to assist you in mitigating your data protection risks and we then decide on the number of days a month or year that you require for your virtual DPO.

© Romano Security Consulting Ltd

Risk Management

We assign you with a highly qualified and experienced consultant who will be your personal DPO and work with you to mitigate your data protection risks. You can then schedule days with your DPO as and when you require them to suit the needs of your business.

Flexible, Trusted, Security Resource

If you are looking for a flexible, trusted security resource to be able to call on and have on hand to suit your requirements we have several DPO consultancy options available, we can be on hand to help as little or as often as you require.
